U.S. Finds Little Substantive Change In Soviet Arms-Control Comments

By Lou Cannon

WASHINGTON - The Reagan administration reacted cautiously Wednesday to President Konstantin U. Chernenko's declaration that U.S.-Soviet relations could be improved if the United States demonstrated genuine interest in reaching agreement on one of four armscontrol proposals.

Asked whether the United States

saw anything new in Mr. Chernenko's statement Tuesday in an interview with The Washington Post, the White House spokesman, Larry Speakes, said, "Not in substance." However, he praised the "constructive tone" of Mr. Chernenko's

stalemate in arms control and mild-clear arms. The Russians aban-ly rebuked Mr. Chemenko for doned these negotiations when the

"President Chemenko has stated that improvements in the U.S.-So-viet relationship depend on deeds, not words," the statement said. "We agree. When the Soviet Union is prepared to move from public exchanges to private negotiations and concrete agreements, they will find us ready.

These words were similar to those employed by Mr. Chernenko in his interview, the first with a foreign journalist since he became general secretary of the Soviet Communist Party in February.

Mr. Chemento singled out four remarks. issues and said that resolution of Mr. Speakes appeared at a White "at least some of them" would open House briefing to read a statement. the way for resuming negotiations It blamed the Soviet Union for the on strategic and medium-range nu-

making his proposals in a newspa-per interview rather than privately.

"Desired States began deploying new missiles in Europe last year.

The four issues included a pro-

posal to prevent the militarization of outer space; a freeze on nuclear weapons; ratification by the Unit-ed States of negotiated test-ban treaties; and a pledge by the United States to renounce the first use of

Of these, the one U.S. officials found most intriguing was the rati-fication of the 1974 and 1976 treaties, which the Reagan administra-tion has opposed because of Soviet resistance to on-site verification.

If this issue can be resolved or a compromise reached, a U.S. official said, then it is conceivable that the Russians might have provided a

U.S. Will Sell Israel Aid on Jet Weinberger Grants Requests

By Thomas L. Friedman New York Times Service

For Technology

JERUSALEM - Caspar W. Weinberger, the U.S. secretary of defense, ended his short visit to Israel on Wednesday with an an-nouncement that the Reagan administration had decided to grant Israel access to the advanced U.S. echnology needed to produce its

ultra-modern Lavi fighter jet. Mr. Weinberger also said that Washington would consider meeting an Israeli request for the purchase of three diesel submarines and buying Israeli manufactured 120-mm mortars for the U.S.

Army.

The defense secretary left Tel Aviv for an unscheduled dinner engagement in Amman with King Hussein of Jordan. Before his departure, Mr. Weinberger said the Reagan administration was anxious to "invigorate the peace pro-

Privately, Israeli officials expressed satisfaction with the two-day visit by Mr. Weinberger. They noted that not only did they receive most of what they asked for, but also that the atmosphere of the meetings was very cordial.

"Basically the Israelis got every thing they hoped for out of a visit of this type," a U.S. official said.

The discussions were extremely warm and friendly and almost jovial. There was no tension between Weinberger and the Isrealis."

The top item on the fsraeli agenda was the Lavi fighter, which is expected to be the bulwark of the Israeli Air Force in the 1990s. The reason to resume bargaining on Lavi project has completed the re-limitation of offensive nuclear search and development phases search and development phases

> opment had been held up for months because of Pentagon restrictions on the export of certain advanced technology items that Israel had ordered from U.S. manu-

facturers. These items included a highly sophisticated tail assembly and details of the composition of a special material to be used in the wing of

other aspects of the production.

After a meeting with the Israeli
prime minister, Shimon Peres, Mr.
Weinberger said: "The Lavi phasethree composite production technology was released to Israel, and this technology is the one that is essential to the production of the

The socretary added that Israel and the U.S. had agreed to "form a joint working team" to study Israci's submarine requirements and proceed to some future solution." Mr. Weinberger also told the Israciis that the United States was considering purchase of the new Israeli-made 120-mm mortar and

ammunition, but he made no commitments, U.S. officials said. The U.S. Army has put out bids for a new mortar system, and the Israeli equipment is understood to be one of the top candidates. Finally, Mr. Weinberger said

that he informed the Israeli defense minister, Yitzhak Rabin, that the U.S. would extend the so-called "offset policy" that was due to ex-The offset policy states that

Salvadoran Rivals Remain Far Apart

By Loren Jenkins
Washington Pour Service
SAN SALVADOR —Both President Jose Napoleon Duarte and his rebel opponents have assessed their historic peace talks as a success, but statements made since by each side todicate that their positions on how to end the five-year civil war remain far apart.

Spokesmen for each delegation said Tuesday that neither of the two most divisive issues between them had come up during the talks Monday in the northern town of La

Palma.
One was the insistence by the guerrillas of the Farabundo Marti National Liberation Front and its political ally, the Democratic Revolutionary Front, that they be allowed initially to share power in the government without participating in elections. The other was Mr. Duarte's insistence that no serious negotiations could take place until the guerrillas laid down their arms.

Most of the public statements so a sharing of power to guarantee its implementation," be said. "The tempreted the decision made at reason we did not raise it at this far have been positive. Both sides interpreted the decision made at the meeting to set up a joint com-mittee to hold a round of further peace talks beginning next month that we knew would prove to be as an important step toward ending stumbling blocks for further dia-

Mr. Ungo said, "There was a coincidence of views between us od of doing it was far from being and the government for the contiunity of the dialogue, and that is the one concrete result of the meetmoderate, conciliatory tone adopted by his delegation at La Palma, next meeting to see where we go the June 1 front had not softened in the one concrete result of the meeting to the United States, but Israel next meeting to see where we go now."

Another official of the rebels' political branch, Jorge Villacorta, said Tuesday from his home in San José, Costa Rica, that the La Palma meeting was a victory for his movement because it had succeeded in institutionalizing the dialogue that he said his movement had been seeking since 1981.

"We did not think Duarte was sincere in his talk about dialogue and felt it was all just a political maneuver," Mr. Villacorta said. "So what we wanted to do was to turn this maneuver into serious negotiations and that we could only do by avoiding placing all our cards

on the table immediately." In effect, that seems to have been precisely what the Duarte government sought to do by seeming, at least temporarily, to soften its hard line on the issue of not holding talks with the rebels until they laid down their arms and agreed to live by the political rules laid down in

El Salvador's year-old constitution. Mr. Duarte said Monday that he "did not mention" the laying down

Debaters Plan to Come Out Swinging By Howell Raines

New York Tomes Service WASHINGTON - Walter F. Mondale and his strategists, con-vinced that the next presidential

debate is the most important event of the fall campaign, are planning a broad assault on President Ronald Reagan's foreign policy and his personal competence. Mr. Reagan's strategists said

that they were planning changes in the way the president is prepared for the debate, and that they expect Mr. Reagan to attack his opponent much more aggressively than he did in the first debate Oct. 7.

According to James A. Johnson the Mondale campaign chairman, the Democratic presidential nomince will use the televised meeting Sunday might in Kansas City, Mis souri, to criticize Mr. Reapan in

particular on several key points. These include his failure to achieve an arms control agreemen with the Soviet Union, his plan to develop a missile defense system based in space, administration pol-icies in Central America and his

Nobel Prizes

By Ronald J. Ostrow Los Angeles Times Service

ATLANTA - Every weekday morning for the last 11 weeks, five government cars with blue lights flashing have pulled out of the federal penitentiary here and headed downtown. Two motorcycles leapfrog ahead to sbut off major intersections before the caravan plunges into the garage beneath the federal courthouse.

Inside, U.S. deputy marshals with automatic weapons fan out in a protective screen as three chained passengers are led from an armor-plated vehicle to an elevator and a 16th-floor holding cell. The three later join seven other defendants in the courtroom where the government is prosecuting its largest cocaine case in history.

The extraordinary precautions illustrate a stark reality: Faced with unprecedented levels of threats and violence against judges and court personnel, the federal judicial system has felt compelled to adopt security measures that could have a farreaching impact on the atmosphere in which justice is dispensed.

Court proceedings requiring extreme safeguards to prevent disruptions, escape attempts and other violence are at an alltime high. At the same time, personal threats against federal judges are up 28 percent from last year.

Assad's Soviet Visit Seen

As Ending Under Cloud

MOSCOW - President Hafez mats said they were puzzled by the

al-Assad ended a visit to Moscow unusually bare treatment given to

on Wednesday that produced new Mr. Assad's visit by the state media

pledges of Soviet support for his and by the wording of a report on country but also signs that he bad talks Tuesday with President Kon-

sent a special problem in the United States, which has a traditional emphasis on courthouses open to the public, noted Stanley E. Morris, director of the U.S. Marshals Service. The duties of his agency include courtroom security and moving prisoners.

"Courts do the public's business in public buildings, and there is a constitutional right to a public trial," said Mr. Morris. That's why judges are concerned with security measures we take -- to make certain it doesn't appear the courts are armed

The nature of those targeted for prosecution by the federal government's anti-crime drive helps explain the upturn in assaults on the judiciary and the judicial process. The targets of prosecution include leaders of organized crime, violence-prone gang members and narcotics traffickers so wealthy that they can sacrifice huge bonds to win freedom.

"The level of people coming in are much higher on the organized crime ladder, and they're people with a significant amount to lose if they get convicted," said Howard Safir, assistant director for operations of the marshals' service.

As a measure of the heightened threat, court security officers detected 135 weapons being carried into the federal court- far more sensitive than those used at air-

stantin U. Chernenko.

The mounting violence and threats pre-ent a special problem in the United States, they were assigned there. And last month, marshals evacuated courthouses in Chicago, Pittsburgh, New York City, Syracuse and Hauppauge, New York, because of bomb threats.

The federal government's court security budget has gone up in response. It rose from \$30.2 million in fiscal 1982 to \$37.4 million in fiscal 1984 and to \$45.8 million in this new fiscal year.

In the Atlanta cocaine trial, a heavy contingent of deputies sits among spectators and along the walls of the large court-

For added security, the deputies require everyone in court to remain seated whenever the three defendants under guard are taken from the room. The defendants leave and enter out of view of the jury.

One reason for the precautions seems obvious: The alleged ringleader of the traf-ficking organization, Harold J. Rosenthal, escaped from a federal prison in Miami in 1981. The latest indictment alleges that he tried to set up the murders of U.S. and Colombian law enforcement agents after he was arrested in Colombia last year.

To keep the peace in the courtroom, the marshals rely heavily on technology. Spec-tators are examined with magnetometers

ports, and their belongings are x-rayed The service also has installed armor to protect judges from gun fire, closed-circuit televisions to screen visitors to judges' chambers and alarms that court workers can set off at the first sign of trouble. Not all federal judges welcome efforts to

protect them, despite the increased threats. "It's very restrictive being protected," said Mr. Safir, the marshals' operations chief. "Say you're a judge and want to go jogging or on a picnic with your family. All of a sudden, you find yourself with people toting guns around you."

Often, it takes a scare to convince balky judges. Judges in U.S. District Court in Savannah, Georgia, had resisted the installation of magnetometers but changed their minds last March after a man looking for the chambers of Judge Wilbur D. Owens was apprehended in the courthouse corridor carrying a rifle.

In the case of U.S. District Judge John H. Wood Jr. in San Antonio, the objections proved tragic. After an assistant U.S. attorney prosecuting a major drug case being heard by Judge Wood was shot at, the marshals assigned deputies to guard the prosecutor and the judge. After two months, Judge Wood asked that the body-guards be withdrawn. Four months later he was assassinated

Chernenko in Private: Fit, Relaxed, Humorous

By Dusko Doder Washington Post Service MOSCOW — "A visitor coming with the first snow is a good omen,"

President Konstantin U. Chernenko said. "According to an old Russian proverb, it means good The 73-year-old Soviet leader

smiled as he greeted his visitor in his Kremlin office Tuesday, pointing at the winter's first snow flurries swirling outside his third-floor

One distinct and perhaps sur-prising impression after talking to the general secretary of the Soviet Communist Party was that behind his stony-faced public image, Mr. Chernenko shows a sense of burnor and good-natured modesty.

At the start of the interview, real-

izing that the services of a veteran translator, Viktor Snkhadrev, were not needed, he laughed and said, "Sukhadrev is without a job now." When he presented the text of his

written replies to questions sent earlier and was reminded by a Kremlin spokesman, Leonid M. Zamyatin, that an English lan-guage transcript of the text was enclosed, Mr. Chernenko quipped, You see, full service."

When A. Alexandrov-Agentov, a veteran foreign policy adviser, in-quired whether The Washington Post would print the full text of the eader's remarks and was assured only that a long story including a.l major points would be printed, Mr. Chernenko joked, "The longer, the

To an observer who has watched him from a distance during infresteady. His delivery was far better than in his public speeches, employing plain language and normal Russian phrases that were in sharp contrast to the stilted formality of Provide editorials. Pravda editorials.

Mr. Chernenko's breathing, however, was short and shallow, although less so than in public ap-pearances. There were reports last Post an influential newspaper?" summer that Mr. Chemenko had been hospitalized with unspecified neart trouble.

He conducted the entire conversation without notes and without consulting Mr. Zamyatin or Mr. Alexandrov. With an eye to the official photographer who was present to take photographs, the Soviet leader placed the visitor to his right, before escorting him to the long table, covered in green felt, where he conducts most of his offi-

In the brief conversation, it was apparent that Mr. Chemenko belongs to a generation of Soviet leaders who came to manhood before World War II and who have vivid memories of war. He alluded to the horrors of war and spoke with conviction about his desire to resume arms control talks with the I Imited States.

Dressed in a business suit of solid dark blue, a white shirt and a blue tie with light blue stripes, he sat quietly and outlined his argu-ments, occasionally playing with the pencil set next to his pad.

Mr. Chernenko's style and approach appeared similar to that of his political mentor, Leonid I. Brezhnev, with whom Mr. Chernenko worked for three decades before rising to the top of the nenko's comments were designed

He seemed both deliberate and critical time in the campaign.

considerate, the type of man wbo serves as chairman of the board. During the interview, be mentioned only two dates, both of which fell within his tenure as Soviet leader. He also made the point of saying that his answers reflected the collective view of the Soviet

Mr. Chernenko steered clear of ideological issues and, speaking as he did to the American audience, showed a degree of pragmatism in his approach to the United States.

Mr. Chemenko's office is a large room with light-yellow silk walls and white silk curtains covering four buge windows about 12 feet (3.6 meters) high. There were no ashtrays on the long table, presumbly because the general acceptant. ably because the general secretary does not smoke. The pencil containers are of cut crystal. On his desk was a neat pile of documents. The only picture in the room was of

Word of the invitation to meet with the general secretary came at the last moment, shortly before a black government sedan arrived to pick up the visitor at bome and drive him to the Kremlin.

There was no need to show identification as the car passed through the offical entrance and drove through the open part of the Kremlin where bundreds of tourists were taking pictures of the ancient Russian churches on the Kremlin

but that the president was not per-sonally engaged in the formation of themes and "attack points." The car swung through a huge iron gate into the closed section of the Kremlin, located immediately behind the wall facing Red Square. Mr. Chernenko's office is in the quent public appearances, the Sovi-et leader appeared fit and in good over the next few days and decide bealth. pating in some of the preparation sessions, is known to feel that a The following is the exact text of Mr. Cheruenko's written reply to the question dealing with his views about a widely held perception that recently a shift in Soviet-American relations had become discernible and hard line is necessary, particularly his views on the prospect for these relations in the coming years:

Indeed, sentiments in favor of a shift for the better in Soviet-U.S. relations are widely spread in the world. This, in our view, reflects the growing understanding of the importance of these relations, particularly in the current international situation.

"Unfortunately, so far there has been no ground to speak of such a shift in Soviet-American relations as a fact of life. Is it possible? I shall give an unequivocal answer to this question - yes it is possible. The resolution of the problems to which I referred earlier would help to bring it about.

"I am convinced that there is no sound alternative at all to a constructive development of Soviet-American relations. At the same time we do not overlook the fact that we have different social system and world outlooks. But if the responsibility which rests with our two countries is constantly kept in mind, if policy is oriented toward peace and not war, these differences not only do not exclude the search for mutual understanding but call for it.

"I have already said in the past and I wish to stress it once again; we stand for good relations with the United States and experience shows that they can be such. This requires a mutual desire to build relations as equals, to mutual benefit and for the good of the cause of peace."

On Carter Arms Policy By David Hoffman Washington Past Service
GLEN ELLYN, Illinois - President Rosald Reagan has alleged that the United States "unilaterally disarmed" in the face of a Soviet arms buildup before he took office, and he laid the responsibility on Walter F. Mondale and the Carter

Responding to students' ques-tions in appearances in the Chicago area Tucaday, Mr. Reagan attacked his opponent on foreign-policy top-ics. He criticized Mr. Mondale for the Iranian hostage crisis, suggested he was naive about the Sandmist revolution in Nicaragua and said he had "failed to repudiate" the Reverend Jesse L. Jackson's sym-pathetic comments about President Fidel Castro of Cuba:

At a high school in nearby Bohingbrook; Mr. Reagan said "we're making every effort" to negotiate with the Soviet Union, and added: What we inherited when we came here was an America that

over the years had unflaterally dis-armed. The administration before ours, they canceled the B-I bomber. They said, 'No, we won't build it.' They didn't ask anything from the Soviet Union in the terms of arms control or anything." Mr. Reagan noted that the SALT-2 treaty had been signed but said, "All that was, was legitimizing

a continuation of the arms race." "Since that treaty was signed, they've added 3,800 more warheads to their arsenal, muclear warheads," Mr. Reagan said. "And, incidentally, my opponent was the president

Reagan was so misguided that he had attacked every president since John P. Kennedy as being a light of the confusion," Mr. Mondale said.

dent Reagan had termed President Kennedy "weak" for "not taking what he called the final step" in the Cuban missile crisis. Mr. Reagan had made the same criticism astic audience of students that were against Lyndon B. Johnson for not designed to show that Mr. Reausing atomic weapons in Vietnam, gan's presidential policies had not iMr. Mondale said.

Mr. Reagan also had criticized Gerald R. Ford and Henry A. Kissinger, he said, as bowing and scraping" to the Soviet Union. And he had opposed Richard M. Nix-on's calls for the ratification of the SALT-1 and defensive missile trea-

Mr. Mondale said that his first debate with Mr. Reagan had stripped away the illusion that Ronald Reagan is governing." A president, Mr. Mondale said, "must be in touch, a president must learn, he must listen, he must lead."

Mr. Mondale also accused Mr. Reagan of failing to master the essential facts of arms control, and recalled the observation of Mr. Reagan's first secretary of state, Alexander M. Haig Jr., that the White House was a "ghost ship."

"It may be 2:30 in the morning." Mr. Mondale observed. The presi dent may be awakened "and asked to make, within a minute or two or three, the most fateful choice in human history. At a moment like that we have a right to demand a president who knows the crucial lacts that he must know?

Nicaragua **Again Rejects Negotiations** With Rebels

New York Times Service

MANAGUA - Nicaraguan leaders have rejected opposition suggestions that they follow the example set this week in El Salvador and agree to talk with anti-govern-

Several opposition political lead-ers, as well as the anti-Sandinist newspaper La Prensa, have used the occasion of the talks in El Salvador to renew demands that the government open talks with rebels.

But a front-page article in Tues-day's edition of Barricada, the official Sandinist newspaper, quoted the coordinator of the governing junta, Daniel Ortega Saavedra, as saying, "The two situations are to-tally different."

The struggle of the Salvadoran

people responds to a real, concrete situation of social injustice and ex-ploitation," said Mr. Ortega, who is the Sandinist presidential candidate in elections scheduled for Nov. "Nicaragua's situation is very different."

only to the extent that the United States supports them," Mr. Ortega said. "When that support ends,

they will disappear, because they have no social base."

[Mr. Ortega said Tuesday that the United States planned to use Soviet weapons captured in Grenada in a plot that would give them a pretext to invade Nicaragua, Reu-

[Mr. Ortega said the weapons were being shipped to Costa Rica and would be given to Nicaraguan rebels there. He said the rebels, disguised as Sandinists, would then attack a Costa Rican border town to give the United States "its long desired opportunity to interventionalitarily in Nicaragua."]

Managua to Shun Talks Nicaragna refused to attend a meeting of Central American for eign ministers to discuss the Contadora regional peace treaty in a letter Tuesday to the Honduran Foreign Ministry, United Press In-ternational reported.

Kulikov Is Visiting Bulgaria The Associated Press

VIENNA — Marshal Viktor G. Knlikov of the Soviet Union, commander-in-chief of the Warsaw Pact armed forces, arrived Wednesday in Sofia to attend a regular ion of the pact's military council, the Bulgarian state-run BTA press agency reported.

Rocket Expert Leaves U.S., Accused as War Criminal

WASHINGTON - Arthur L.H. Rudolph, who designed the rocket that first took American astronauts to the moon, renounced his U.S. citizenship and left the country under pressure from the Justice Department when confronted with evidence that he was a war criminal, it was announced Wednesday.

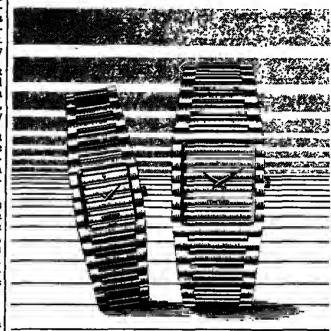

Neal M. Sher, head of the Justice Department's Office of Special Investigations, which tracks down Nazi war criminals in the United States, said Mr. Rudolph "literally worked thousands of slave laborers to death" in the building of V-2 rockets for the Nazis.

Mr. Rudolph, now 78, left in March for West Germany, according to Mr. Sher, and in May he formally renounced his U.S. citizenship. The Justice Department said this was not made public until the State Department finished the paperwork on the case.

Mr. Rudolph, who was among 119 German rocket experts brough to the United States with Dr. Werner von Braun after World War II ultimately supervised the planning, design, production and testing of the Saturn-5 rocket that carried Apollo-11 to the moon in 1969.

Mr. Sher said there was evidence that Mr. Rudolph, while supervising V-2 missile production from 1943 to 1945, had participated in the persecution of slave laborers.

"The conditions were utterly outrageous, gruesome, grotesque," Mr. Sher said. He said that even Albert Speer, a top Nazi official, in memoirs called the conditions parbarous

Abortion Now a Bitter Political and Social Issue

By John Herbers New York Times Service

WASHINGTON — The issue of abortion has become so prominent in this year's presidential campaign that many people on both sides of the question believe that it will not go away whatever the outcome of the election and that the resulting conflict could be bitterly disrup-

Members of the so-called rightto-life movement have compared the issue to slavery in the last century and to racial discrimination in the South before the enactment of U.S. civil rights laws in the 1960s.

Their opponents compare it to the drive early in this century that led to the Prohibition amendment

9 Policemen Are Killed In Southern Philippines

ZAMBOANGA, Philippines — About 60 Communist rebels ambushed a police jeep and killed nine policemen in a five-hour gun battle, a military report said Wednesday.

The report said the ambush occurred Monday on the outskirts of Dapitan City, 450 miles (725 kilometers) south of Manila on the is-

Issues '84

This is another in an occasional series about issues facing Americans during the election campaign.

could be politically damaging no matter what position they took. And in the decade after the U.S. Supreme Coun overturned state laws against abortion, the issue was only a marginal concern in presidential campaigns.

This year, it has been at the center of the controversy over religion in politics. The question was argued at length in the presidential and vice presidential debates last

President Ronald Reagan, who supports a constitutional amendment that would ban abortions, came close to calling abortion murder. Asked if he considered it that he replied that under a California law a person who physically abuses

of its leaders have accused the juscan be charged with murder. "Now isn't it strange," he cootinued, "that the same woman could In the past, most seekers and have taken the life of her unborn legal ban on abortions, or murder.

In view of the resurrence of religious conservatives in politics, the issue is expected to continue boiling under any administration.

Kennedy Draws Big Crowds on Stump Senator Is Effective Surrogate for Democratic Candidates swipes on what for him is unfamil-

CAN YOU THINK OF SOMETHING GOOD RONALD REAGAN HAS

DONE FOR BLACKS

By Paul Taylor Washington Past Service HARLINGEN, Texas — In the closing weeks of the presidential campaign, Senator Edward M. Kennedy is serving as one of the

Democratic Party's most effective

surrogates for the presidential can-

No one draws such big crowds on his own, tub-thumps the Demo-crats fight songs with more relish or brings better credentials to the task of stirring partisan resentment to President Ronald Reagan's habit of quoting Democratic presidents such as Kennedy, Truman and

As he campaigns for the ticket of Walter F. Mondale and Geraldine A. Ferraro, Senator Kennedy has assumed the role of gatekeeper of his brother's legacy.

"I'll travel across the country in this campaign to say that Ronald Wilson Reagan has no right to quote John Fitzgerald Kennedy," he roared to a Mexican-American udience of more than 1,500.

The rousing declaration drew a standing ovation here in the Rio Grande valley and at stops in Houston, San Antonio and Austin during a three-day Texas swing last week. By Nov. 6, Senator Kennedy will have carried the same message to 20 states.

said. "So I have a simple question: Why Reagan doesn't quote Nixon

Io his performance on the stump, the Massachusetts senator invites comparisons to a championship boxer working a few exhibition

SEE.. THAT'S A

TOUGH ONE. 15

THIS A RIDDLE

On the subject of deficits, he says with a clear appreciation for the irony of the observation: "The truth may hurt but this is it. Ronald Reagan is the biggest spender in American history.

Senator Kennedy also talks of the "realism" that guides his ap-proach to government programs. "As Democrats, we do oot favor government for its own sake, programs for their own sake or spendiog for its own sake. And we will not permit the Republicans to set a double standard. We believe that when a housing program fails, it should be changed or abolished. But we also believe that applies on every side. When a oew pinpoiot guidance system for our missiles repeatedly misses its target in field tests, then the weapon should be changed, or the funding should be cut or ended."

Senator Kennedy's itinerary, which has been set largely by the Moodale camp, will take him to California, Illinois, Michigan and most of the East Coast states in the next three weeks.

Any Kennedy trip inevitably aises questions about his presidential intentions. He took himself out of the 1984 race last year, citing family reasons.

Aides say he refuses to talk about 1988, but they acknowledge that the hiring of Robert Mann, a Texan, as his press secretary is the latest move of a politician who knows he must broaden his base into the South if he is to become a successful presidential contender. On the Texas trip, Mr. Kennedy

struck up a good relationship with Governor Mark White, a Democrat, who comes from the party's WARSAW (AP) - A crowded moderate-conservative wing. For the Record

A Los Angeles Times Poli shows the Reagan-Bush ticket leading Mondale-Ferraro 53 percent to 42 percent in California, compared with a 57 percent to 38 percent margin nationwide. (L(T).

BEING KNOWN AS A NUMBER CAN BE A VERY PERSONAL THING

Look, for example, at the individual registration number on the back label of your bottle of Beefeater Gin. If it were JF 1222146, it would tell you that your Beefeater was distilled Thursday, January 7, 1982, under the supervision of Thomas Bowman, Master Stillman, and that the distillation was approved personally by Mr. Norman Burrough, a direct descendant of our founder, before it was allowed to leave the distillery.

Does it help to know all this? Yes That number is a vital part of Beefeater's quality control. Because the number is Mr. Bowman's personal signature. And

Mr. Burrough's as well. And any artist is at his best when he has to sign his work.

Ottawa Sees U.S. Ties Entering 'New Chapter'

TORONTO - Joe Clark, the external affairs minister in Canada's new government, said after talks with U.S. Secretary of State George P. Shultz that the two countries were opening "a new chapter" in relations focused on removing the problems that have strained relations in recent years.

Despite the ontward show of cordiality Tuesday, the two sides re-mained unable to make much progress on the most contentious is: between Canada and the United States — the problem of acid rain, caused by emissions from U.S. industrial plants that are believed to cause extensive damage in the U.S. Northeast and in Canada.

Mr. Shultz, faced with the latest Canadian complaints, said the United States was aware of the problem, but contended that more research was needed before "billions of dollars" are spent on new

more frequent meetings of environ- rions."

But Mr. Shultz did not seem irri-

that it is e good friend. In recent years, there have been

ter Pierre Elliott Trudeau on economic and foreign policy issues.

An aide to Mr. Clark said that when the external affairs minister referred to "the opening of a newchapter," he meant the new government was broadly based and would

He pledged that there would be Canadian-U.S. economic rela-

The French official said it was clear that the Russians would seek fact that while he is in the hands of to "maximize the benefits coming out of this operation."

The French Communist Party mnounced that Afghanistan has consented to its request to allow French anthorities to visit Mr. Abouchar, United Press Joternational reported. The party said that on the personal request of the Communist Party leader, Georges Marchais, the Afghan government has agreed to allow French officials to visit Abouchar and to deliver him mail from his family."

Diplomats in Kabul were previously denied access to the impris-oned journalist despite repeated protests from the French govern-ment. The French party, closer to Moscow than any other West European Communist organization, made its petition to Kabul separately from the government.]
French officials' concern in-

creased after a report by the official Afghan press agency that criticized France for "using the most ridicu-lous and irresponsible justifica-tions to defend the crimes of an agent who has acknowledged un-dertaking espionage activities."

Mr. Abouchar, who is on the staff of Antenne 2, one of the three

state televisioo oetworks, was lot of subjects, like acid rain," Mr. seized by a Soviet Army unit Sept. Shultz said at a news conference 17 while reporting on Afghan suggestions. 17 while reporting on Afghan guer-rillas who are fighting troops of the Kabul government and the Soviet occupation forces.

His detention has caused an out-

cry in France, with interventions by Prime Minister Laurent Fabius and Minister of External Relations Claude Cheysson, and subsequent Soviet attacks on them for participating in an "anti-Soviet cam-

paign."
French officials and a group of journalists participating in a com-mittee to secure Mr. Abouchar's release say they believe Moscow is using his case to try to intimidate journalists from reporting on Af-ghanistan. Normally, it is impossi-ble for Western reporters to secure visas to enter Afghanistan, and many have reported on the insur-gents by joining them in crossing the frontier between Pakistan and

HILTON INTERNATIONAL

Agca: Talking About the 'Bulgarian Connection' (Continued from Page I) offer, via a middleman who Mr. Agea testimony "changes so often and is implicated the "godfathers" of the so controversial that we would not million Deutsche marks (\$1.2 million) for shooting the pope. The assassination is the work of the social pope.

The assassination is the work of the Soviets, who are deeply worried about developments in Poland,"
Mr. Celebi declared.

On July 22, 1981, Mr. Agea was convicted on the basis of his initial confession and sentenced to life imprisonment. For a brief period, the case appeared to be closed. But Mr. Agea's assertions that he had

acted alone did not satisfy the pre-siding judge, Severino Santiapichi.

Reasoniog that the pope's
would-be assassin was oeither a
lover nor mentally unbalanced, Mr. Santiapichi issued a statement on Sept. 24 explaining his verdict. Mr. Agea, he wrote, was merely the visible point of e "deep conspiracy ... orchestrated by secret forces, earcfully planned and directed down to the smallest detail."

Less than two months later, Judge Ilario Martella was appointed to open a new investigation. Al-ready well known in Italy as the magistrate responsible for uncovering a multimillion-dollar bribery scandal involving the U.S. aircraft company Lockheed and Italian politicians, Mr. Martella had a reputation for honesty, a passion for detail and e marked dislike for per-

According to former Defense Minister Leho Lagorio, the first signs that Mr. Agea might be prepared to break his self-imposed silence came during a meeting with two Italian secret service agents in two Italian secret service agents in his cell at Ascoli Piceno prison on Dec. 29, 1981. This meeting has caused some controversy in Italy as it took place at a time when Mr. Agea was still subject to rigid isola-

Suggestions in the Italian press that the agents might have tried to encourage him to give evidence against Bulgaria in return for a lighter prison sentence have, however, been ruled out in a report by the public prosecutor.

In any event, it was oot until May 1982 — a year after his cap-ture in St. Peter's Square and five months after his interview with the secret service agents — that Mr. Agea began to talk freely to Mr. Mantella. At this stage, he did not directly implicate the Bulgarian secret service. Instead, during a week of continuous interrogation, he accused the "godfathers" of the Turkish maffa of having been behind the

to Bulgaria and the provision of men may have met. Bulgaria and the provision of two false passports in the names of "Yoginder Singh" and "Faruk Ozgun," Mr. Celenk's role had been to suspects in the case in the period garian news agency said Mr. Agea's "Pope John Paul II in May 1981.

The Bulgarian connection had become official.

In a statement Sept. 8, the Bulgarian connection had become official.

NEXT: Agea changes his testimony

lion) for shooting the pope.

Even though Mr. Agea still did not point the finger directly at Sofia, the possibility of e "Bulgarian connection" had already become the object of intense interest by the spring of 1982.
Parallel to Mr. Martella's inves-

tigation, another magistrate, Ferdinando Imposimato, had been pursuing a separate inquiry into reports of a Bulgarian spying ring in Rome involving an Italian trade union official, an extreme leftist terrorist and several members of the Bulgarian Embassy.

Acting on information supplied by the trade union official, Mr. Imposimato ordered the confiscation of passenger lists at the offices of the Bulgarian state airline Balkanair in April 1982. He also interrogated Mr. Agca.

Italian counterintelligence. meanwhile, was compiling a photo album of possible Bulgarian suspects. Mr. Lagorio, then defense minister, was later to tell Parlia-ment that this album was handed over to the magistrates in June 1982. It was made available to Mr. Imposimato and to Mr. Martella.

During the summer of 1982, allegations of a direct Bulgarian connection to the papal plot also began surfacing in the mass media.

on the grounds of the need to preserve the secrecy of Mr. Martella's investigation. In particular, ministry officials have refused to say exactly when be was allowed access to the mass media.

forthcoming trial in view of claims that Mr. Agea could have gotten at least some of the details about his alleged co-conspirators from the press. In an interview in Sofia, for example, Bekir Celenk maintained that Mr. Agea had based accusaseries of articles that had appeared in the Turkish press two months

Written by one of Turkey's foremost lovestigative journalists. Ugur Mumcu, the articles in the

tion of three Bulgarian officials as his alleged accomplices in Novem-

Abuzer Ugurlu, named by Mr. Agea as the man who belped him escape to Bulgaria, was in prison in Turkey. He had surrendered to the Turkish martial law authorities in March 1981, two months before the attempted assassination of the pope, and was under investigation

on smuggling charges.

Mr. Celenk, meanwhile, was in West Germany between May and September, according to his pass-port. He oow claims that he was well aware of Mr. Agea's allega-tions against him but did not take them seriously.

Referring to stamps in his pass-port, Mr. Celenk says be spent Oc-tober in Yugoslavia and Austria and traveled to Bulgaria on Oct. 24, two days before a formal warrant for his arrest was issued by Mr. Martella. He has since been placed under observation by the Bulgarian authorities, who have refused to allow him to leave the country.

The three Bulgarian officials who were to be named by Mr. Agea

as his "controls" had stayed on in Rome for many months after the failure of the assassination attempt in May 1981. The first to leave was The Italian Justice Ministry has the assistant military attaché at the trined down repeated requests by embassy, Major (now Lieutenant Colonel) Zhelio Vasilev, who left ton on the conditions in which Mr. Agea was held at Ascoli Piceno, one of Italy's most modern prisons, end of his tour of duty.

The embassy's administrative of-ficer, Todor S. Aivazov, left Italy on Nov. 5, 1982, on what he has depicted as a routine business trip to Solia. His return flight back to Rome, he told Italian investigators, The point could be relevant at a was booked for Nov. 26, but he canceled it at the last moment after hearing that he could be arrested.

Serger I. Antonov, the deputy station manager of the Bulgarian state airline, Balkanair, had also remained on in Rome despite the fact that his own office had been tions against him in May 1982 on a searched by police in April 1982.

Arrested in November 1982, he has been in detention in Italy for nearly

All three Bulgarians later insist-ed that the fact that they had stayed in Italy despite ample opportuniindependent leftist daily Cumhuries to flee supported their argument described the involvement of Mr. Ugurlu in the Mr. Agea.

The two names he mentioned in particular were Abuzer Uguriu and Bekir Celenk.

Mr. Celenk and Mr. Uguriu in the smuggling of goods through Bulgaria one article, on March 6, noted that Mr. Celenk had been staying clear signs of alarm at the direction the interlocking Italian investigations and sessisted to his escape from Turkey to Bulgaria and the provision of the men may have met.

promise, he even 'confesses' that the Bulgarians ordered him to kill the pope."

In a move interpreted by many Italian commentators as a kind of insurance policy against such a de-velopment, the Bulgarian police arrested two Italian tourists on flimsy spying charges. After being sen-tenced to long prison terms, the Italians were eventually released unconditionally in 1984.

Judge Martella spent the summer of 1982 laboriously following up all the clues contained in the confessions of Mr. Agea the previous May. His opinion of Mr. Agca's credibility as a witness appears to have been strengthened when many of the details in his testimony checked out.

One of the new leads enabled the pagistrates to track down a scoond-string Gray Wolf living in Switzerland, Omer Bagei, who had helped Mr. Agea during his wanderings around Western Europe. Picked up by Swiss police, Mr. Bagei confessed to hiding the 9mm pistol used in the shooting of the pope and delivering it to Mr. Agea at the Milan railroad station. at the Milan railroad station.

Mr. Agea's evidence also helped the West German police close in on Musa Serdar Celebi, the leader of the Frankfurt-based federation of Turkish rightists. Mr. Celebi was arrested in Frankfurt on Nov. 3 and eventually acknowledged that be had known Mr. Agea as "Murat." He was extradited to Italy the following January. In the autumn of 1982, after a

gap of almost six months, Mr. Agea started talking to Mr. Martella again. This time his allegations were even more sensational than they had been in May. The attempt on the pope's life, he told the Italian magistrate, had been carried out under the direct supervision of three Bulgarian agents in Rome.

According to the Italian Foreign Ministry, it was not until Nov. 11 that Judge Martella inquired about the legal and diplomatic status of Messrs. Aivazov, Vasilev and Antonov as Bulgarian officials resident in Rome. Arrest warrants against the three Bulgarians were issued on Nov. 24.

At 9:30 A.M. on Nov. 25, Italian anti-terrorist police entered a nondescript five-story apartment building in Rome's Nomentana district. After a few moments, they emerged with Mr. Antonov, 34, in handcuffs. The arrest warrant accused him of having taken part directly in the attempted murder of Pope John Paul II in May 1981. Now your dollar investments need never take a holiday, but are always available when you do.

All too often, your money can become just plain lazy. It sits in your brokerage account et little or no interest. Or weeks are lost while cheques gradually arrive and clear. But not any longer. Because Merrill Lynch, the leading Wall

Street investment firm, has invented a new kind of brokerage account for shares and bonds that not only serns money, but manages it at the same time. The Merrill Lynch Cash Management

Account* International (CMA*I) puts your money to work every single day. Any incoma generated by your securities is automatically reinvested in an ioterest-bearing account at Merrill Lynch International Bank Lld (London). So your cash is virtually never idle and you

achieve a high rate.

Yet you can access your equity instantly. If you need cash, just write a cheque or use the special VISA card to make purchases and get cash advances in local currency wherever you happeo to be travelling. Methane in Atmosphere Is Increasing

New York (Combined Dispatches) — Methane, which scientists believe may be contributing to a slow warming of the Earth's surface, has been increasing in the atmosphere at an annual rate of 1.1 percent since in 1977, a team of researchers at the University of California at Irvine achievements in recent years.

Carbon dioxide from the burning of fuels such as coal and gasoline is believed to be the principal substance that reflects heat back to the Earth, causing the so-called greenhouse effect. But, the researchers point out, methane is also a factor. The gas also plays a role in urban smog and the depletion of ozone in the atmosphere.

Methane is released into the atmosphere by grazing animals in their digestion of cellulose and by biological action under water in flooded rice paddies and swamps. Both of these have been increasing because of the need to feed the Earth's rapidly growing population.

In New Zealand, one scientist has suggested a way to use some of this excess methane. David Lowe told a conference in Wellington that the daily output of flatulence from a single sheep contains enough methane to power a small truck for 25 miles (40 kilometers). The only problem, apparently, is harnessing it.

Moderate Drinking Held Fetal Risk WASHINGTON (UPI) — The first large-scale study of its kind shows that even moderate drinking during pregnancy can affect the weight of a

feins scientists have reported.

Women who had as few as one or two drinks a day in the first three

months of pregnancy risked giving birth in low-weight infants, according to the study, done by the National Institute of Child Health and Human Development. There appeared to be only a slight risk with less than one lowed identification of so-called T drink a day, but because there are still too many other unresolved cell subsets of lymphocytes, a form questions, the researchers advised women to avoid alcohol altogether of white blood cell.

Infants born at lower-than-normal weight are considered to have a greater risk for disease and death later in their lives. The researchers reantiqued that the study, which investigated 31,604 births, had not assessed the effects of diet and had not differentiated among various

Drugs for Epilepsy Found Effective

BOSTON (AP) — Most epilepsy victims can look forward to lives that are targely free of seizures, especially if their disease is brought under control within the first two years, a new study has found.

The five and a-half-year study, conducted at King's College Hospital in London, produced far more favorable results than other follow-ups of

epilepsy patients. The researchers, writing in the New England Journal of Medicine, attributed this finding to having followed a more typical cross section of epilepsy patients than had earlier studies.

All of the patients in the study took seizure medicines, either phenty-

loin or carbamazepine. After two years of treatment, it was found, about three-quarters of new epilepsy patients had been free of seizures for at least a year. During the entire follow-up, 82 percent of the patients bad a two-year period in which they were completely seizure-free.

Syphilis in Newborns Rising in U. S.

CHICAGO (AP) — Syphilis cases among newborn infants in the United States jumped 38 percent from 1978 through 1982, even though proper prenatal treatment could have virtually eliminated the disease among newborns, researchers say.
In 1982, congenital syphilis afflicted 159 U.S. newborns, the research-

ers wrote in the Journal of the American Medical Association. Mothers of affected infants tended to be young and unmarried. Almost two-thirds had received no prenatal care, and the others had received substandard care, said the researchers, working for the National Centers for Disease

Control in Atlanta.

Syphilis is passed from mother to fetus with almost 100-percent certainty if the mother's illness is in the early, infectious stages and goes certainty if the mother's illness is in the early, infectious stages and goes untreated, Unlike other sexually transmitted diseases, however, syphilis in newborns can be prevented or can be effectively treated while the infant is still in the womh, said the research team.

Nobel-Winning Discovery: Honoring a 'Windfall' for Doctors

By Lawrence K. Altman

New York Times Service

NEW YORK — This year's

Nobel Prize in medicine honachievements in recent years.

The practical applications of the discovery are already having a broad impact on most areas of medicine. As one of the winners, Dr. Cesar Milstein, has said, they are "a windfall of basic research."

Monocional antibodies are units of the immune system tailored by scientists in the laboratory to seek specific cells in the body.

One important part of the wind-fall referred to by Dr. Milstein is an improved accuracy in diagnosing ailments in fields ranging from ob-stetries to geriatries. The new techniques have opened up fresh avennes of research into infertility, brain disorders and diabetes.

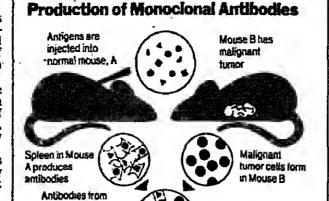

Another part of the windfall aftreatments for such chronic and devastating diseases as cancer and leukemia. The techniques have al-

Also, monoclonal antibody techniques, by identifying T-4 lymphocytes as the cells destroyed in acquired immune deliciency syndrome, helped doctors recog-nize the first cases of AIDS in 1981.

Moreover, monocional antibodies have solved the crucial problem of precise reproducibility in the preparation of reagents, the sub-stances used in chemical reactions to measure and produce other substances. As a result, monoclonal antibodies are now used so often in diagnostic tests, therapy and other essentials of medicine that the new techniques will account for an estimated \$500 million in sales this year and an estimated \$2 billion by 1990.

HE windfall bas come from the novel technique that Dr. Milstein, of the British Medical Research Council's laboratory in Cambridge, and his co-winners, Dr. Georges

J. F. Köhler, of the Basel Institute
of Immunology in Switzerland, and
Dr. Neils K. Jerne, professor emeritus at the Basel institue and formerly its director, developed in 1975. Through newer modifications, scientists can oow make unlimited amounts of pure cloned antibody against almost any antigen. (Antibodies are the natural protective substances that the body forms to attack antigens, which are foreign substances such as microorgan-

The German-based BMW-one of the most progressive car manufacturers in the world—is the first automobile company to install a Philips PREM.ID. system (Programmable REMote IDentification) to handle the growing demand for customised cars.

The system includes "recognition" modules, which are programmed through a microwave signal. These signals determine which particular item is required for which individual car.

In this way, a personalised car - with a special gear box, transmission system, interior, and so on - can be included in the normal assembly line. The P.REM.ID. system is readily adaptable to a wide range of needs, and has already been applied in the fields of agriculture, security and high-level production.

In the People's Republic of China, Wuhan's Number 2 Steel Works, has recently made use of Philips expertise in industrial

Customised BMWs in Germany and steel quality in China - both profit from our industrial expertise.

automation to improve its efficiency quality and use of raw materials. The Philips electronic weighing and batching system, which now forms the sophisticated heart of the factory, is responsible for the automatic and precise addition of the necessary additives.

Individual converter, hopper, and batching systems are interconnected via a supervisory micro-computer controller. In addition. electronic weighing techniques are employed at various other stages of the process.

For example, when scrap is charged into the converter, it is weighed on a specially designed platform with built-in protective features to prevent damage.

For more information about Philips industrial expertise, write to the Philips organization in your country or to Philips VOA-0217/IHA9. Eindhoven the Netherlands.

Philips. The sure sign of expertise world-wide.

PHILIPS

For Peace in South Africa

By awarding this year's Nobel Peace Prize to Bishop Desmond Totu, general secretary of the South African Council of Churches, the Norwegian Nobel Committee recognizes "the courage and heroism shown by black South Africans in their use of peaceful methods in the struggle against apartheid."

Like last year's award to Lech Walesa, this year's choice makes the point that peace is more than the absence of war between states; peace also depends on the quality of relations between governors and the governed. The Polish Communist regime fought Mr. Walesa and Solidarity with martial law. South Africa's ruling minority uses troops, truncheons and

banning orders to enforce its hateful system of racial inequality. Underscoring the implicit parallel between apartheid and communism, Pretoria's anti-Communist crusaders aped a classic Kremlin style and greeted the Nobel news as a non-event. Fortunately their monopoly over information is far from complete.

Bishop Tutu's prize honors the best in South Africa, black and white. It honors the tradition of peaceful struggle in the face of the ugliest provocation. It sustains the hope of change without chaos and bloodshed. A wiser South African government would embrace his cause. The present one makes it oecessary.

- THE NEW YORK TIMES.

On a June day in 1982, outside a cathedral in the black township of Soweto, a huge white policeman beating an elderly black man with a stick suddenly found himself confronted by a small black man in clerical robes who held a cross aloft until the beating stopped. It was Bishop Desmond Tutu, performing, at high risk, the mission of mercy and justice for which be now receives the Nobel Peace Prize. Never has the honor gone to a worthier person than this 53-year-old Anglican bisbop, perhaps the most widely accepted black critic of apartheid

permitted to operate in his country today. Two qualities distinguish Bishop Tutu. The first is the purity and force of the moral passion be directs at South Africa's system of legalized racism. The second is his deep commitment to nonviolence. So outrageous and total is apartheid's assault on human dignity that it is always a marvel to Westerners that there are any blacks left in South Africa with the magnanimity and patience to support peaceful change. Bishop Tutu is one. He has a vision of a society in which individuals, equal already in God's eyes, become equal as well in the eyes of the law. He accepts "that things may come to such a pass that people feel compelled to resist them violently. My purpose is to try to keep that to a minimum

While millions of South African blacks will probably find in this Nobel award encouragement for the cause of racial equality, many whites, especially Afrikaners, will see it as one more intervention by a hostile outside world. It is too bad that their inability to understand is so rock hard and so deep. For surely this is a moment when a wise South African leader would respond in another way. President P.W. Botha portrays himself as a reformer, but his new constitution utterly ignores blacks and drew minimal Asian and "colored" support. At his inauguration last month he held open, in his maddeningly bedged fashion, the possi-bility at least of political consultations with blacks. Bishop Tutu is a fit interlocutor —

proven, everywhere respected and justly so.

President Botha can easily denounce the bishop and his Nobel prize. How much better would be for all South Africans, not least whites, if he could hring himself to speak of the hishop and his prize in a way that indicated some understanding of the moral fervor of the man and of the torment that the policy of apartheid hrings not only to South African blacks but to people everywhere. That torment and Desmond Tutu's fervor to end it are what the award of the Nobel prize is all about. - THE WASHINGTON POST.

The Promise of La Palma

Words tell a lot about the mood in El Salvador now that President Duarte has met leftist guerrillas in La Palma, Suddenly, insurgents who had been "terrorists" in official broadcasts were "the ones who had taken up arms." As politely, the rebel radio dropped references to "the puppet Duarte" and spoke of the "regime of Jose Napoleon Duarte."

Bitterer words, and deeds, will have to be swallowed before these adversaries can end a civil war that has elaimed 50,000 lives in five years. But just possibly the actors will become captives of the hopes they have aroused by promising to "humanize" the conflict through a peace commission and a second meeting in late November, Something very like that hap-pened after Egypt's President Anwar Sadat flew to Jerusalem to acknowledge the existence and bumanity of Israel. All such parallels are treacherous, but there is a touch of Sadat in the boldness of Mr. Duarte's leap.

Mr. Duarte's invitation to the guerrillas was his own idea, according to Thomas Pickering, the U.S. ambassador in San Salvador, Taken by surprise, Mr. Duarte's U.S. partners are clambering aboard the peace convoy. President Reagan calls the talks "momentous." The State Department detects vindication for its promotion of the spring elections that Mr. Duarte worr. If these negotiations prove successful there is vindication enough for all U.S. factions: the administration for its persistent effort to boister the San Salvador government, and its critics for insisting that the aid be conditioned on taming the death squads and curbing coup-minded rightists.

That Mr. Duarte's timing was right seems to be confirmed by the minimal quibbling in

arranging the meeting at a week's ootice. All concerned had ample chance to seize pretexts to stay away, but all came except a guerrilla inder who blamed logistics, not politics, Now they face competing ideas for letting elections resolve a military conflict that nei-

ther side seems strong enough to win soon.
The rebels have insisted all along that their price for participation is a share of power in an interim regime. That demand has been repeatedly rejected by Mr. Duarte, who wants the opposition to lay down arms and take its chances in next year's local elections. There may just be room between these positions for a bargain that would give the left a voice in an electoral commission with some security powers to assure a peaceful plebiscite.

There is nothing bypothetical about the left's obsession with security. The death squads, although in abeyance, are still intact. And as El Salvador's first elected civilian president in five decades, Mr. Duarte still rules by military sufferance. Human rights abuses have abated, but the suspicious killing of civilians in military operations continues.

It was with an eye to these realities that Mr. Duarte chose the date for his rendezvous in La Palma. Mouday was the fifth anniversary of the coup led by reformist officers against a despotic military dictatorship. But within mouths a military backlash promoted by the bard right ended the experiment and ignited the civil war. The promise of change in 1979 was aborted by repression and the rise of the insurgency. El Salvador's friends now need above all to protect this new promise against the inevitable reaction from both extremes.

- THE NEW YORK TIMES.

Other Opinion

South Africans on Bishop Tutu

His fearless courage and his public statements, which have often discomforted those whose consciences they disturb, have sometimes hidden a man of deep Christian conviction and humility who cries easily at the hurts of his people. [The Nobel Prize places him] among the great men of South African history. - From a communique issued by

the South African Council of Churches.

Tutu stands for anything but peace. His actions seldom correspond to the image he likes to present. [The award is] one of the most amazing [in Nobel history]. Beeld (Johannesburg).

If this had been a country like Nazi Germany, Bishop Tutu would not have been around

to carry on his campaign. But that is oot something that would strike him. We fear that instead of being a shepherd of God's flock, he is going to be even more political oow.

- The Citizen (Johannesburg).

'Morality Is Very Important'

Apart from highlighting the Irish issue, it does not appear that the IRA has achieved any constructive results with its terrorist acts. Morality is very important to any political cause. In using such unscrupulous means, the IRA has forfeited whatever claim to legitimacy [it] might have had. If there is to be a solution to the Irish problem, it will have to come through negotiation and not senseless violence.

- The Straits Times (Singapore).

FROM OUR OCT. 18 PAGES, 75 AND 50 YEARS AGO

1909: Spaniard Is Mourned in Paris

PARIS — The demonstration in Paris [on Oct. 17] against the execution in Barcelona [on Oct. 13] of Francisco Ferrer, the radical leader, passed off without any serious breach of the public peace. It had been announced that its organizers guaranteed the maintenance of order and had established their own police to see that the procession should not approach the Spanish Embassy. The entire police was mobilized, and the Republican Guard, mounted and on font, was on duty. The procession, which numbered about 30,000, marched along singing revolutionary songs and indulging in shouts hostile to the Spanish Government and King Alfonso. On arriving at the place de la Concorde it dispersed without disturbance.

1934: Monarchist Labels in Vienna VIENNA — Possibilities of a Hapsburg resto-ration were convincingly refuted [on Oct. 17] when the police and Heinswehr men in uniform were mobilized to pick up little paper labels strewn about in the inner city. The paper slips were red and white, the Austrian colors and carried the inscription: "Our motto is the Emperor Motio." As soon as they were discovered, forces were sent out in numbers to pick them up in a hurry before this new disease could infect the general public. Since the Nazis inaugurated propaganda by paper slips, which innocent-looking promenaders let fall in the streets in the dark hours, all political groups have made use of this method. The monarchist slips were shown oo mercy.

Tutu's Prize: Less Victory Than Warning

CAMBRIDGE, Massachusetts

— Bishop Desmond Turn's
Nobel Peace Prize publicizes the predicament of South Africa's black majority. Denied political partici-pation and citizenship in their own country, blacks yearn for the liberty that Bishop Tutu champions.

Polls show that South Africa's most popular black leader is Nelson Mandela, jailed since 1963 for his leadership of the African National Congress (now a guerrilla organiza-tion based outside the country), but Bishop Tutu has emerged in recent years as the country's most widely respected above-ground leader.
A slight, owlish man with a ready

smile and quick wit, Bishop Tum, was the Anglican dean of Johannesburg and later bishop of Lesotho before be became general secretary of the South African Council of Churches. The council is the country's main ecumenical body, representing 12 million churchgoers, of whom 88 percent are black.

For several years the government, angered by his opposition, has refused to grant him a passport. In the past two years he has been permitted to travel frequently to Europe and the United States on temporary travel documents.

His message has become more vigorous as the white minority has continued to ignore the political as-pirations of the black majority. Last month South Africa scrapped its 74-year-old British-style constitution in favor of a new system that provides limited political participation for "coloreds" and for Asians of Indian and Pakistani descent, but nothing for blacks. Bishop Tutu was among those who urged whites, "coloreds" and Asians to refuse to vote for the constitution and the delegates to the oew parliament.

He has bitterly criticized the forced movement of black landholders from their ancestral villages to desolate government-designated "homelands." These overcrowded sinkholes of poverty represent only 13 percent of South Africa's land, yet the 22 million blacks are nearly 80 percent of the population. There are 2.7 million "coloreds," By Robert I. Rotherg

800,000 Asians and only 4.6 million whites in South Africa. The black population is growing at a rate dou-ble that of whites. By the year 2000 there will be about 36 million blacks and only 5.3 million whites. About 75 percent of all blacks will live in the cities, whereas now only about

half live in urban areas. Bishop Tutu has pointed to that disparity and urged the white gov-ernment to take heed. The reforms that he has demanded are more moderate than those demanded by the African National Congress. He is nevertheless regarded as a radical

by supporters of the government. Bishop Tutn's compassion and tirelessness are evident. For some time he has demanded that the government regard blacks as citizens; abolish the pass laws that greatly restrict blacks' mobility within South Africa, causing the arrest of

gas, police dogs, bullets, detention without trial and banning orders. The authorities are growing in in-transigence, belatedly Mr. Botha wants to demonstrate that he is tough and cannot be trifled with. He is too late because he has not

come to terms with the determination bordering on recklessness of black youth who openly flaunt the emblems of the outlawed African National Congress. He cannot con-trol the militancy of black labor unions, which are going to be the power to watch. There will be more and more police harassment, ban-nings and detentions, but these will not deter those who are determined to become free.

> not yet involved in the business of helping to destroy apartheid. They

the government and individuals. The Nobel award will not shift his 300,000 each year, lift controls on where blacks may live, and greatly fundamental emphasis away from reconciliation in honor.

Nor will it alter the fundamental face of apartheid. The government has too much at stake: the survival of a white-run country. The Nobel Prize is not an indication that the

struggle will now be altered or that a victory for Africa is at hand. At the end of Allen Paton's 1947 novel "Cry. the Beloved Country" a hlack preacher says: "I have one great fear in my heart, that one day when they turn to loving they will find we are turned to hating." Bishop Tutu has the same fear. He is dedicated to persuading the government to begin the process of serious reform before it is too late.

The writer is o professor of political science at the Massachusetts Institute mark of his message.

So is the courage that he has displayed in the face of hostility from of Technology. He contributed this comment to the Los Angeles Times.

'We Who Are Oppressed Will Be Free'

on their education.

T HE indisputable point is that we who are oppressed will be free. That is not in question. The logic of history, even Afrikaner his-tory, dictates that this is so. All that the whites can do is decide whether they want freedom to come reasonably, peacefully or through blood-shed and armed struggle. Those are the only options available. [P.W.] Botha can play a decisive

role by opting for a bold policy of change. Anything else will fail. He can oever satisfy the right wing. So he should go all out to win the world and the rest of South Africa by opting for political power-sharing. Unrest, in the schools and on the labor front, is endemic in our country and will continue to be so until political power-sharing becomes a reality. More and more blacks are becoming disillusioned as those of us calling for change hy peaceful means have our credibility eroded by the authorities' often brutal and

excessive action. Calls for peaceful

change are being answered by tear

have done some good things for their employees, but all within the framework of apartheid, and really no more than what a good employer should have been doing, Ultimately their efforts are improvements and oot changes. They are making apartheid more comfortable rather than dismantling it.

The international community must make up its mind whether it wants a peaceful resolution of the South African crisis. If it does, then let it apply pressure — diplomatic. political, but above all economic — on the South African government to persuade it to go to the negotiating table with the authentic leaders of all sections of the South African population before it is too late.

Maybe it is too late, judging from the conduct of the Reagan adminis-tration. If so, then what [former Prime Minister John] Vorster called the alternative too ghastly to con-template is upoo us. But hope springs eternal

The Trend Seems to Be Republican

By George F. Will

WASHINGTON — These have been days that caused tongues to click, lips to purse, brows to furrow and fists to cleach in both parties. For at least one of President Rea-

gan's most trusted confidents, there were signs of trouble even before the-Louisville debate. This confident thoughl it was out of character undignified and unpresidential—for Mr. Reagan to refer to his opponent as "what's-his-name." Since the Louisville debate, Re-

publicans talk less about this being a realigning" election. But they may be mistaken, at least in this sense: We may oot be on the eye of a realigning election, we may be in the middle of a realigning era that no trivial event, such as a debate, can disrupt.

For Mr. Mondale these have been the most satisfying days of his long march. The debate was the first moment since January when his courtship of the electorate did not go unrewarded. Until then the more he campaigned the more "negatives" be-came attached to him in polls. That pattern changed after the debate. But not much else changed. The "270 problem" - electoral votes, that is is as intractable as before.

In the afterglow of Mr. Mondale's debate performance it was almost possible for Democrats to dream of President Mondale. Did I say dream? It may have been a nightmare for Gary Hart and Mario Cuomo. Mr. Hart would have to run for re-election to the Senate in 1986. After you have been the lion of New Hamp-shire, the star of Super Toesday and the toast of California, it is hell to go

B OSTON — From the female side of the political gender gap we

hear concerns about women's rights, the fairness issue and especially

peace. From the male side we hear

concerns about leadership, tough-ness, strength. Indeed, there are peo-ple ready to dub the gender gap with a new name: the macho gap.

What is most intriguing about the difference between male and female voting preferences is that they run

strongest among the young. A New York Times-CBS News poll showed

that among 18-to-29-year-olds, men prefer the Republican ticket by 57 percent to 30, while women prefer the

into one (often impossible) ideal.

dominance was really FDR's oceman show: In 1948 Harry Truman did oot even get a majority of the popular vote. (Since 1944 oo Northern liberal Democratic candidate for president has received a majority of the popular vote. The only two Democrats who have - Johnson in 1964 and Jimmy Carter, barely, in 1976 — were from states of the Confederacy.)

If Mr. Reagan wins this year and a Republican wins in 1988, Repoblicans will govern at least until 1992, establishing a 40-year dominance un-

der four elected presidents. Since 1920 seven of the 15 elections have been landslides, with the winner getting more than 400 electoral votes, as in 1980. But in the elections immediately after four of those seven, the party that had won the landslide was defeated (1932, 1960, 1968, 1976).
Therefore, Mr. Busby may see more inevitability than history will admit.
In recent days a small event, the women on the issues, whether they are talking about the bomb or the deficit. What they disagree about is

The Mogul Remains By Kai Bird

Chiefs Pass,

and Max Holland

This is the second of two articles. WASHINGTON - No one knows the real wealth of Egypt's Osman Ahmed Osman. His nephew. Ismail Osman, says the companies his uncle founded are worth up to \$1.6 billion but that the elder Osman "does not control anythinghimself directly." Onservers outside the family believe that his assets and

control are considerable. At the heart of the family empire is Arab Contractors Company, which employs more than 60,000 people Osman-owned companies in banking, insurance, wood and aluminum

products, food processing and real estate employ another 40,000.

Nasser "nationalized" Mr. Osman's domestic operations but allowed him to retain the foreign operations of Arab Contractors. In the 1960s the company's contracts in.

Sandi Arabia, Kuwait, Jordan, Lihyaand Iraq became extremely lucrative When Sadat succeeded Nasser in 1970 he turned to Mr. Osman, who became a friend and companion. Later a son of Mr. Osman was married to Sadai's 14-year-old daughter. In 1974 Mr. Osman was appointed minister

of reconstruction and housing.

Arab Contractors flourished under Sadat's infirah (opening) economic policies. As a cabinet minister Mr. Osman canceled a statute that prehibited any single private firm from receiving more than \$100,000 in gov-

ernment contracts annually. By 1976 Mr. Osman was meeting opposition in the National Assembly. The cabinet proposed that a tariff exemption be withdrawn. Mr Osman fought to preserve it and he lost. Sadat reshuffled the cabinet and Mr. Osman was out - or so it seemed. In retrospect, Mr. Osman seems only to " bave adopted a lower profile As his... closest adviser, Mr. Osman accompanied Sadat to Jerusalem in 1977.

Milad Hanna, an engineer and one

of 1,500 writers, intellectuals and ... rechnocrats arrested by Sadar in-1981, believes the only reason he andseveral members of the National As-sembly were arrested was their role in a seeking to oust Mr. Osman from the cabinet. Ismail Osman denies that. Mr. Osman has adapted. He has close ties to the Moslem Brother. bood. Last year he married his sec-

ond son to the daughter of Abdei Azim Loukma, a prominent leader of the Brotherhood who was imprisoned.]. for years by Nasser.
Egypt is dependent on Mr. Osman and others like him. Employees of and Arab Contractors are the highest paid in the country. lo a society ooto, rious for bureaucracy and fatalism, in

Denand For OPEC Oi Fails To Rise

By Randa Takieddine

PARIS - Since ministery of the rganization of Petroleum Export-ng Countries met in July/and disrissed the weakness of the oil mar-ket and the need to stick to their individual production chotas, various officials have been overopumistic in their forecast on the recovery of oil demand in the fourth quarter of this year.

They had predicted demand for OPEC oil in the fourth quarter to reach about 19 million to 19.5 million barrels a day, opening the door for the organization to raise its pro-duction quota from the current 17.5 million barrels a lay. "Such an additional share," sail the Kuwaiti oil minister, Sheikh di Khalifa al-Sabah, "would be negotiated in an extraordinary meeting of the organization at the end of October. Well-informed sources indicated on October 17 that an extraordinary meeting would take place on October 28 in Gereva.

Although the oil market is slightly improving, with spot oil prices firming up, compired to what they were two months ago when light crudes were selling \$4 below their official level, this slight improve-ment does not rally indicate that OPEC's wishful minking is materializing. Prices of oil on the spot market are still below the official

The situation of the oil market has taken a completely opposite trend-from what it was 10 years ago when the Western world was tremendously vulnerable to a shortage of oil supplies. It is interesting to note that at the peak of the tanker war in the Gulf between Iraq and Iran; despite frequent attacks on oil (Communed on Page 12)

By Jerome D. Davis COPENHACEN -On Oct. 1, Queen Margrethe of Denmark/turned the valves of the Danish North Sea gas pipeline, commencing deliveries of Danish gas to the national grid. It is anticipated that this gas will supply 15 to 20 anticipated that this gas will supply 15 to 20 percent of Danish energy needs, roughly the same prosortion as elsewhere in Europe excluding the hetherlands and Britain.

Yet me presence of royalty could not fully dispel on problems into which this project had

run. Isitial deliveries could not be absorbed by the markets for which they were originally in-tended. The price paid for the gas, indexed to gas, il and fuel-oil prices, was many times the price anticipated when the project was begun in 199. Domestic sales had largely failed, industral sales were lagging. To market the gas, the sate-owned Danish Oil and Natural Gas Co. ad entered into a hasty contract with the Dantransportation and threats to tank-sh electrical cooperatives to supply them with ers in Gulf waters, the international otherwise unsalable gas, thus noderwriting the oil market remained unaffected by economics of the gas project through electrical

(Communed on Prace 12) rate increases to Danish customers.

transmission companies, obliged to take previously contracted for amounts of high-priced natural gas, have renewed emphasis on "low end-use value" applications of the fuel, as in electrical power generation. Current surpluses have been aggravated by the coming on stream of projects undertaken to the late 1970s and early 1980s and by newly contracted amounts of

A stormy day at the Ecofisk field southwest of Stavenger, Norway.

Natural Gas: Now It's a Buyers' Market

Yet, in another sense, the seller's market of a few years ago has developed into a buyer's market. Forecasts of natural gas supplies currently under contract could match demand to the 1980s, possibly into the 1990s, and there are considerable noncontracted amounts that should be up for the taking.

Old gas exporters have changed policies. The Dutch, far from phasing out their export role as planned, have actually been willing to extend existing contracts and place an additional 3.8 Jerome D. Davis is professor of economics and billion cubic melers ennual quantity on the planning at Roskilde University in Denmark.

While differences between continental gas Dutch export market. Norwegian deliveries of markets are substantial, there is much in the Danish experience that is common to them all. Norwegians have reserves in Sleipner (300 billor cubic meters) and the gigantic Troll field (some 1.200 trillion cubic meters). These reserves, plus discoveries at Haltenbanken and elsewhere, have secured Norwegian status as the European exporter of consequence,

Algeria bas major liquefied natural gas con-tracts with the French, Belgians and Spaniards, and is capable of expanding its throughput in the trans-Mediterranean pipeline from the current 2.2 billion cubic meters to 11 billion or even 16 billion cubic meters a year in the future. Soviet gas is playing a growing role on the Continent, it is an important source of supply for the German and Italian markets, and elsewhere is assuming an increasing "spot market"

This richesse of gas poses problems. There is (Continued on Next Page)

The West Has Achieved Oil Security — For Now

By Joseph Stanislaw and Daniel Yergin

CAMBRIDGE, Massachusetts — A few years ago, it would have been unthinkable that attacks on tankers in the Gulf would barely excite a flicker of interest in the world oil market. The current surprising calm results from the fact that the goal of the 1970s — energy security — has, at least for this part of the 1980s, become a reality.

New dangers could arise from major upheavals in the Gulf or a shift in the balance of power within the region. But, in the meantime, the world has become almost accustomed to the Iran-Iraq war. Iran's moment of greatest superiority seems to have passed, and the war lonks more like a stalemate - a status quo of persistent but manageable uncertainty.

The underlying market fundamentals give good reason for confidence. Two significant cushions, which did not exist in the 1970s, now provide protection against disruption. First, the world oil market is dominated by a surplus of about 11 million barrels a day of capacity out of total capacity of about 55-56 million barrels a day. The non-Communist dependence upon the Gulf has fallen from 41 percent in 1979 to 20 percent today. Still, those numbers are not quite as reassuring as they might look at first glance million barrels are located within the Gulf.

Currently, about 7.5 million to 7.8 million barrels a day flow out of the Gulf via the Srait of Horniuz. Approximately 3.3 million barrels a day of additional capacity — "surge capacity" — has been identified around the world, although there is some question as to how rapidly that extra production could be called into production. A further 1 million to 12 million barrels a day could be exported through underutilized pipelines in Saudi Arabia.

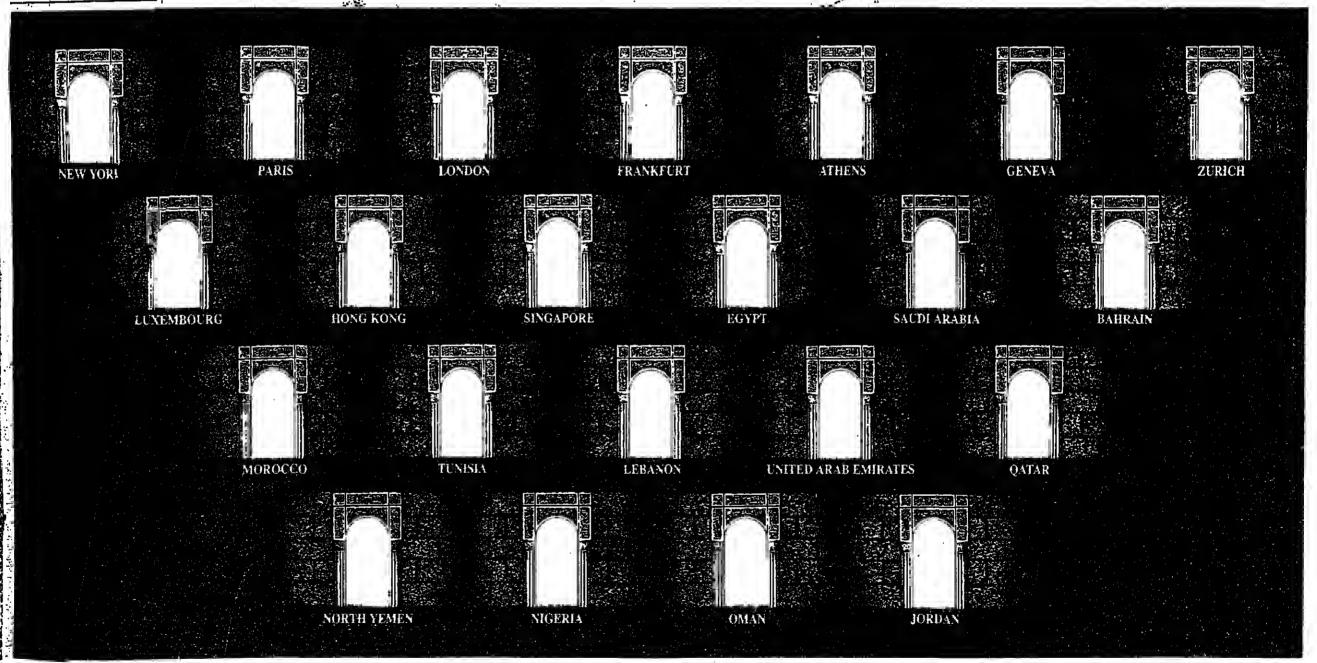

Moreover, a consensus has emerged from the last year that the Strait of Flormuz could not be closed and traffic disrupted for any significant period of time. Any such attempt would trigger strong efforts to protect transport by a consortium of consumer and

The second cushion is in the form of the build-up of strategic stocks of oil on the part of the consuming countries. While mandated in 1974 by the original treaty that set up the International Energy Agency (IEA), these stocks have only become a significant

WORLDWIDE, THE WAY TO ARAB BUSINESS IS THE ARAB BANK.

If you plan to do business in the Arab word your strategy should include Arab Bank Limited.

Our focus is on A ab business. More that 100 of our branches and affiliated offices are concertrated in the Arab countries of the Middle East.

Nobody knows more about the subtletes of doing ousiness there; we've

been at it for 54 years. Each of our branch managers is a specialist in his home country, steeped in the knowledge it takes to succeed there. And our network is worldwide, with branches in the major financial centers.

This means, for example, a Hong Kong or Singapore manufacturer can raise capital in London or Zurich or

New York, market products or services throughout the Arab world, and do it all through one bank. The Arab Bank.

With nearly \$12 billion in assets and five decades of growth and experience, we're one of the largest financial institutions in the Arab world. Our services range from the simplest funds transfer through the most complex trade and

project financings. Get to know the Arab Bank. Call us in London (01) 606-7801; in Paris 359-34-34; in Athens 3255401; in New York (212) 715-9700.

Let us show you the way to Arab business.

Western Nations **Have Achieved Energy Security**

(Continued From Previous Page)

factor since the beginning of this decade. In 1979, when the Shah of Iran fell and the second price run-up began, the U.S. strategic reserve was only 91 million barrels. Today, it stands at 436 million barrels, which would compensate for more than two years of Gulf oil at the current level of import into the United States. But the U.S. reserves cannot be considered

In the United States, the government actually takes title to the oil in its reserve. Other Western governments use different systems. Some establish minimum compulsory levels that must be held by private companies. Others have established government corporations to finance and manage energy reserves. West Germany requires refineries to hold certain levels of mandatory stocks. The Japanese government does both. Altogether, the strategic reserves of the IEA nations total just under 600 million barrels. This, theoretically, would cover about 75 or 80 days of oil consumption if the entire Gulf flow was interrunted—or 190 days.

of oil consumption if the entire Gulf flow was interrupted — or 190 days, if the 3.3 million barrels a day of surge capacity and the unutilized 1.2 million barrels a day pipeline capacity were called into play. The IEA agreement establishes an arrangement to share oil among its

activated if the supply shortfall exceeds 7 percent.

The European Community has a similar pulicy for holding and using oil inventories in the event of a disruption. The IEA's 7-percent threshold would be met if the Strait of Hormuz was completely blocked and all

21 countries in the event of a disruption. The IEA agreement can only be

alternative production outside the cost were brought on stream. Until recently, governments were not prepared to release government controlled inventories in the event of less than 7 percent shortfall. The IEA has agreed through an informal process to consider the use of inventories and to coordinate stock policy in smaller disruptions. The oil importers themselves are taking steps to enhance the security of the flow of oil. Iraq is building a network of pipelines that will enable it to a serious, protracted disruption:

REFINERY CAPACITY (Thousand Barrels A Day)

	1973	1980	1983

	15,155	15,000	12,190
	5,460	5,485	4,360

is uncertain, and depends more than anything else on the political determination of governments and companies.

Still there are concerns about the strategic reserve. While the U.S. Administration has promised "early release" in the event of a crisis, the actual method of release has yet to be clarified — some methods of consideration could actually put upward pressure on the price. Secondly, there is a question about how quickly the oil would physically be released and introduced into the supply system. Thirdly, exclusive focus on the strategic reserves can obscure a very important change — the growth of government reserves has been more than matched by a decline in privately held stocks. Private companies, feeling the pressure of high carrying costs, have in effect surrendered the maintenance of security to

In terms of security, the market conditions are much more favorable to consumers than they were in the 1970s. Moreover, oil companies and governments — and the public — have learned a great deal. There is justification for the confidence that another crisis can be managed hence than those in the past. But this confidence has been bought at a high price.

Decline in World Oil Demand and Lack of New Fields Provoke Company Mergers

By John M. Berry

WASHINGTON --- The wave of oil-company mergers that is chang-ing the face of the industry in the United States is very likely far from over, according to industry execu-

A steady flow of rumors names "smaller" companies such as Phillips Petrolenm Co. and Unocal, with 1983 revenues of \$15.2 billion and \$10.1 billion, respectively, as potential takeover targets.

There is even talk that T. Boone Pickens of Mesa Petroleum Co. whose company unsuccessfully sought control of Gulf Oil Corp. but walked away with an estimated profit of about \$500 million when Standard Oil of California ac- \$1 billion lower than those of Chevquired it — will make a run at Mobil Corp. Phillips, the 16th-largest Ameri-

can industrial corporation both in terms of sales and stockholder equity, has itself been in an acquir-

While Phillips officials make a strong case that acquisition of become a more efficient producer and marketer of petroleum prod-ucts, industry abservers believe the company also wants to become big-ger quickly in order to make Phil-lips harder for any other company er this year that it would fight any takeover "very aggressively." Of course, sheer size is no guar-

antee of protection. The \$13.2-billion acquisition of Gulf by Socal, now officially renamed Chevron Corp., proved that Gulf's sales of \$26.6 billion in 1983 were not even

to meet antitrust concerns.

Industry executives and analysts say there are two primary reasons for the wave of mergers:

First, the U.S. and, indeed, the worldwide market for petroleum products will grow only modestly in coming decades. In this mature industry, profitable companies are going to be those that are the most efficient. In several instances, mergers have been attempted or completed because the bidder be-lieved combining operations made sense in terms of efficiency.

Second, the likelihood of discovering giant new oil and gas fields, particularly in the United States, is diminishing rapidly, Small new dis-coveries are made all the time, but The enlarged Chevron, even after spinning off some Gulf assets as required by federal antitrust rulings, may end up as the nation's fourth-largest industrial company, behind only Exxon, General Motors and Mnbil. Its challenger for fourth place will be Teraco which

A look at the \$10-billion Texaco acquisition of Getty illustrates continuation of a pullback that be Some will go as a result of spinning erry, both these points, according to company spokesmen. "We feel we are a stronger, better company as a result of acquisition of Getty's relargely from another 11 North Cenare will assets, but most will simoff Getty assets, but most serves, particularly in this country; tral states, at least as far as retail this is the most politically secure marketing of gasoline was con-environment and the number one cerned. market for petroleum products," the spokesman, said.

amount of reserves in proved fields. The acquistion of Getty nearly doubled Texaco's worldwide re-serve of oil and natural-gas liquids to some 15 states in the North Cen-and more than doubled them in the tral area, many of which Texaco wants in do so more efficiently and United States,

Meanwhile, looking at the flat prospects for demand for refined ing mood. Last month it reached an behind only Exxon, General Moagreement to buy Aminnil Inc.

(Continued From Previous Page)

considerable purchaser pressure to revise old contracts. Most critical for the buyers has been the revision of the "take-or-pay" provisions of their contracts, provisions that require the purchase of a minimum quantity of gas per year, or, in the event of failure to "take" the minimum, the payment of a penalty on the difference

Here, purchaser refusal to take the gas or pay the agreed-upon penalty is most notable in the current Spanish-Algerian LNG controversy. Spain's Enagas has refused to take more than 1.5 billion cubic meters of a contract for 4.5billion cubic meters per year, a refusal that has led to Algeria's claim for the resulting penalties. (These could amount to \$500 million or more

Elsewhere, it is rumored that there are similar complications, most notably with the Norwegian Ekofisk gas under Continental contract.

Here, the evidence is clouded by production declines in the fields concerned. Deliveries to the Continent slipped by 8 and 10 percent in 1982 and 1983, respectively.

Another symptom of the buyer's market are persistent rumors of contractual renegotiations particularly with regard to prices. All purchasers of Dutch gas are reportedly prepared to take Soviet gas a the 1990s. the price issue up for renegotiation.

milar reports have the French and Belgians renegotiating their Algerian LNG contracts. The degree to which these procedures are taking place is difficult to ascertain as renegotiation of gas contracts are among the most closely gnarded secrets in the industry.

Beijing Pins Hopes on Offshore Oil Discoveries; Outcome May Affect Long-Term Hong Kong Policy

LONDON - The likelihood of China's tampering with Hong Kong's freewheeling capitalist system when it regains the British colony in 1997 may hinge on the fortunes of Western companies now searching for offshore oil in China.

China desperately needs huge amounts of foreign currency to linance the modernization program needed to compare with other industrialized cations. Beijing had been counting on the 30 or more Western companies now drilling off the Chinese coast to find Saudi-sized oil reservoirs, which would cover its import bill. Wells have been drilled in the most likely geological structures during the last nine months, but so far none have yielded oil in commercial quantities.

These grim results, even more than the bargaining skills of Britain's foreign minister, Sir Geoffrey Howe, may ensure that Hong Kong remains a capitalist enclave within a vast Communist state. The Chinese realize that keeping Hoog Kong's financial institutions intact will provide an alternative source of revenue if no big oil deposits are found.

Five years ago, when China first allowed Western compa-

nies to carry out seismic tests in the South China Sea in preparation for the leasing of offshore lots, oilmen were calling the region "the last frontier." Now there is talk of one French company breaking off its lengthy exploration contract with China if it does not make a major find within the

next 12 months.
Others may follow. A former exploration manager with an American company said: "You drill your best shots first. Then you rexamine the data, and if these are negative, you have to search for more subtle traps, which probably means reducing the size of the potential reserve."

Normally, with the expenses of offshore drilling, laying pipelines back to mainland China and helping to build oil terminals, oilmen calculate that any well producing less than 3,000 barrels a day would verge on being noncommercial.

In addition, China expects the oil companies to shoulder all the exploration costs, which can run into many millions of dollars. Only, when commercial reserves have been found will the Chinese government-run oil company agree to start contributing with 51 percent of the development costs. China took its tough bargaining stance after studying contracts between the majors and other producing nations, and added a few unique twists of their own.

The unsuccessful wells have been drilled throughout the South China Sea and within the Chinese side of the Gulf of Tonkin. Those exploitable reservoirs that may exist, geologists say, may be random pools instead of one large one. This makes production and the estimate of the reserves' size extremely difficult," a geologist said. It also makes secondary recovery — by steam or gas — the process of boosting the pressure within a depleted oil formation to extract the remaining crude — prohibitively expensive.

Atlantic Richfield discovered natural gas south of Haman island, in the Gulf of Tonkin, which the Chinese say is promising. The French state oil company, Total, along with Sun, Pennzoil and Idemitsu are also operating in the Gulf of Tonkin, much to the anger of the Vietnamese. Hanoi lays claim to Chinese territorial waters in the Gulf of Tonkin. A drilling vessel, the Giomar Java Sea, chartered by Arco, sank in a storm mader mysterious circumstances last year, and U.S. naval authorities think the Vietnamese might know more about the incident than they are telling. The U.S.

government is still investigating the incident. Some of the Western seismic vessels operating in the South China Sea were also harassed by pirates posing as floundering Viet-Damese refugees.

It was beginning to seem to oilmen that "the last frontier" had plenty of hazards and few rewards. However, the Chioese Oil Ministry said that Shell and Esso reportedly struck oil recently after a string of unsuccessful wells. But the size of their Wenchang discovery, east of Hainan, has yet to be

Nevertheless, the Chinese and the oil companies are mardedly optimistic about the search in the South China Sea, if only to justify the colossal sums already spent.

The oil prosecutors also have doubts about extending their search to mainland China even though seismic crews - who map the formations by measuring the speed at which sound or shock waves travel through different rock strata, have found encouraging results in far western China, although it is too far from any tanker port to do the oil companies much good. But Chinese geologists say that at least two-thirds of all-sedimentary basins - where oil is found - have yet to be mapped. However, letting the Western oil companies roam the country looking for oil goes against China's isolationist

Most likely, the Chinese will try next to entice the oil companies into searching in other zones off the coast. But few companies will be willing to risk more costly dry holes unless China relaxes its licensing terms and assumes some of the exploration costs. The biggest boon to the companies, of course, would be a major oil discovery.

The World Bank has financed development of small-energy resource projects in the Third World such as this new windmill that supplies water and energy to a village on Lake Victoria in Kenya.

Gulf Conflict Forces Refining Industries Into Hard Decisions companies. The pattern of product demand in West-ern Europe suddenly took a new shape. Uotil 1973 more than 50 percent of the Western European prima-ry energy demand had been based on heavy fuel oil. momentous days included two revolutions in the world crude oil industry. First, OPEC member states LONDON - The Iranian revolution of 1979 and took the right to set world crude oil prices. There had would run out of oil just after 2000.

the outbreak of the Iran-Iraq war in 1980 virtually saved the world refining industry by forcing it to make

Now, the imminent start-up of new Middle East plants is more than just a promise, particularly in Saudi Arabia. Production is already flowing from the Saudi Yanbu plant on the Red Sea, a joint venure between Mobil and Petromin, the Saudi state oil company. The Petromin/Shell refinery in Jubail is due for start-up next year. So is the oew Petromin/Petrola refinery at Rabigh. Petromin is already planning a new plant at Yanbu. Qatar, Kuwait and Abu Dhabi are all expanding existing plants.

Abrupt and severe increases in world crude oil prices imposed by the Organization of Petroleum Exporting Countries in 1973-74 and in 1979 caused oc in the world refining industry. Before 1973 and the rise of OPEC power — refinery construction and operation had been comfortably and easily regu-lated by the major oil companies. They could match oil output to the need of an international market that in the 12 years before 1973 had experienced a demand increase from 5 to 6 percent a year. They could exercise this enormous power because they had equity control in virtually all world crude supplies outside the

Equally, the bulk of world refinery capacity was under their control. More than that; their commitment to serve and possit from the ever increasing demand for crude oil worldwide led to their executing an unparalleled program of refinery construction, particularly in Western Europe, that oow hangs albatrosslike from their necks.

The greater the demand, the greater the oeed for plants to refine crude oil into the products wanted by the market. As long as the major companies could dominate oil sources, control hundreds of refineries The world of oil changed in October 1973. Those was turning sour. Worse things happened for the

been virtually no change in the price of world crude oil for more than 10 years. This fundamental change in the international oil trade came like an explosion to major companies. Their plans for ever-expanding markets, more refineries and more markets were knocked askew. Equally radical were the moves made by OPEC states to nationalize the oil and gas reserves within their own borders.

With two blows, OPEC had taken command of world crude-oil pricing and deprived the international oil companies of equity control of two-thirds of the world's crude-oil reserves. The comfortable and easy regulation of the world oil-producing and refining dustry had gone. OPEC had taken the oil.

The companies, the seven majors especially, were left with the world's refineries, terminals, tank farmsand pipelines. To stay in business, to serve their markets, they occded OPEC crude at OPEC prices. They bought it and succeeded in persuading their huge, multinational range of customers to buy at the new, high prices. But for more than two years after the revolutions of October 1973, world oil demand in the non-Communist world fell, from 47.6 million barrels a day at the end of 1973 to a daily demand average of 44.9 million barrels at the end of 1975. The Western ropean oil-market sector was hit worst, with demand falling off by nearly 2 million barrels a day in

"At the end of 1975, European refineries overall were operating at some 30 percent below capacity. Oil companies were stuck with high cost, capital-intensive oil-processing plants that they had built over the eding 12 years. The business strategy in Europe had been to bring crude to be processed at refineries located at or near major marketing centers.

A number of new plants, under construction as the around the world and keep a firm grip on world OPEC revolutions were happening, were completed product markets, their power and profits were assured. and commissioned even as the European oil market

Most of the new spate of refineries had been designed to process the heavy crudes of the Middle East, which were to give a refinery yielding of more than 50 percent heavy fuel oil.

Large consumers of heavy fuel oil, like the steel, glass, aluminiom, cement and electricity generation industries, faced with buge increases in fuel oil costs, switched to other fuels.

Western European oil refiners found that fairly new plants were operating far below capacity. They also felt, for the first time ever, market resistance to the prices they were charging.

Companies had intense discussions about refinery

closures, but none of them shut plants. A new fear loomed. From the Middle East came reports that Saudi Arabia and Kuwait were to start major refinery construction programs. They would be modern plants eared to the new needs of the market. They would focus on the output of transport fuels, gasolioe, diesel and kerosene for aviation. The markets in these products had held hard worldwide even as prices had increased after 1973, although demand for fuel fractions had fallen.

From the end of 1975, despite a series of OPEC price increases, crude oil prices had not mounted significantly in real terms, after allowing for world inflation and variations in currency values. Oil came into its own again, so much so that by the end of 1979 world consimption was at a record level of more than 64 million barrels a day. In the late 1970s, refining in the United States,

where the industry had oot been so beavily hit as Europe, recovered its buoyancy. Io Western Europe there was some recovery, with the industry resolving its heavy fuel oil surplus problem by deciding to design and install special plants to yield more of the salable transport fuels.

be ignored. The golden days of plenty had come again, crop of problems awaits world refiners.

agencies, governments and strong voices in the oil industry itself that at 1979 rates of usage the world But between Jan. 1, 1979, and Jan. 1, 1980, the

OPEC "marker" price for crude oil jumped from \$13.34 a barrel to \$26. There was an immediate effect. on the oon-Communist world's crude oil refining and consumption. From a 1979 daily usage of 51.2 million barrels, demand fell by the end of 1980 to 48.5 million barrels. As crude prices continued to swing upward and world recession set in, consumption in the non-Communist world slumped by the end of 1983 to 44.6 million barrels a day, the lowest overall daily average since 1972. This time the slump was shared. In the three years from 1980 to 1983, the United States lost 3 million barrels a day of oil usage, down to a daily 16.1 million barrels, the lowest since 1971. Western Europe lost 2.8 million daily barrels of consumption to give a year's daily average of 12.2 million barrels, the lowest sioce 1970. Japan, the third-largest regional user of crude oil, lost more than 1.1 million daily barrels to produce its lowest daily consumption average since

1971 of 4.4 million barrels. Companies had to act. Refioeries have been shut of sold in every major European relioery area, in the United States and in Japan, More than 90 plants have been closed in the United States, Even the heavily oildependent Japanese have closed plants. More will follow. Despite a slight upturn in oil demand this year. European plants continue to work at around 30 per cent below capacity.

Although the international oil industry, like others is going through a period of surgery and reshaping optimists believe it will emerge leaner and fitter. Its current recession and the world surplus of crude available against prevailing demand has forced oil companies and others away from the development of alternative fuels based on coal, tar sands and plant crops (gasahols). There is persisting work oo additives to replace lead in gasoline, Lead-free gasoline will be The impact of new refineries around the Gulf was to ohligatory in the industrialized world by 1990. Conservation Shrinks Demand for U.S. Electricity

By I. C. Bupp

CAMBRIDGE, Massachusetts —The U.S. electricity utility industry is in the midst of basic changes, perhaps the greatest changes in its history. American electricity consumers have seen the price they pay for a kilowatt-hour (kwh) of electricity climb continuously for 15 years, tripling and in some cases quadrupling during that period. Further increases — more "rate shocks" — are inevitable as two dozen new and hugely expensive nuclear power plants enter service in the next four years.

Meanwhile, flattened growth in peak-load demand and in electricity use has already produced a na-tionwide surplus of generating capacity, which will prevail at least into the early 1990s. Whether new generating capacity will be needed in the middle or late 1990s is hotly disputed. At one extreme, a recent study by the U.S. Department of Energy projected a requirement for almost 450,000 megawatts (the approximate equivalent of 450 new nuclear or coal plants) by 2000. Many other analysts dispute such large numbers, contending that no new generating capacity will be needed in the United States until

well into the 21st century.

The latter are probably correct. All currently available evidence points to the emergence of a mature market for electricity in the United States, with demand growth — which once far exceeded the rise in gross national product - only matching GNP growth for the fore seeable future.

among all classes of electricity con- though with considerable additionsumers. Few want in use more elec- al delays and, hence, cost increa-

helping these consumers. Applimore work out of a kilowatt-hour \$100 per barrel. are rapidly becoming more available. Many already on the market the companies in the U.S. electric more than double the efficiency of power industry bear the burden of electricity use at a cost less than half that of generating a kilowatthour by burning oil, gas, or coal deeply hart other companies, and less than one-tenth the cost of which today are in reasonably the first several years of electricity that will be produced by most of the new nuclear plants. Prototype technology not yet on the market, confronting the entire power indus-but realistically likely, will produce try. much greater savings, enhancing efficiency by a factor of 10 in many cases, and by an astounding factor of 100 in a few.

In the face of these promising technological developments in energy use and in the face of stiffening consumer resistance to higher prices, about 30 U.S. electric power companies are struggling to com-plete some 45 partly built nuclear plants all of which have experienced cost overruns of at least 100 percent and a few by a nearly unbelievable 1.000 percent.

plants will actually be finished is no means far-fetched uncertain. About 8 to 12 will almost certainly be canceled and an equal number almost certainly

cost of electricity from burning oil

While only a small fraction of incomplete nuclear plants, the con-sequences of their struggle could sound financial health. The reason is the possibility of what has been vividly labeled as "Death Spiral"

The Death Spiral works like this: leading to the idle capacity of lower sales per unit of installed capacity. This means higher fixed costs per kilowatt-hour sold, in turn causing turns causes the cycle to repeat.

The prospects for a Death Spiral How many of these incomplete in the U.S. utility industry are by challenges facing the U.S. utility industry are by challenges facing the U.S. utility industry. In France, as in the Unit-

completed. What happens to the place for energy services. This is result is that nuclear power will remaining two dozen is currently one of the most severe challenges soon be a much larger fraction of

Petroleum

It is clear that a powerful, price-undeterminate, but the best guess is ever to face the management of this induced conservation mood exists that most will be completed alieuty.

EDF's generating capacity than makes technical or economic sense. hnical or economic sense.

EDF has promised that nuclear power will mean lower electricity bills for French consumers. For this to happen, demand for electricity must begin to rise in France. Tn assist demand growth, the compa-ny has mounted an aggressive marketing campaign that is, ironically, partly aimed at its own subsidiary, Gaz de France. Many of the gas company's prime industrial cus-tomers are being courted with of-fers of cheap electricity and free electrical hook-ups. This campaign adds weight to the speculation that EDF's nuclear program — a mana-gerial and technical tour de force — may have been too successful.

I. C. Bupp is director of utilities and energy management, Combridge Energy Research Associates, Cambridge, Massachusetts.

Excess Coal Production Causes Worldwide Crisis in Industry

WASHINGTON — World coal producers, nn less than oil producers, are plagued with so much excess production capacity that prices remain under considual was accompanied by a 7.5-percent drop in prices, to an

Coal reserves are so abundant, however, that this situation has developed hand in hand with record levels of coal production, at least in the United States

and Australia, the two largest exporters.

In the United States, the profit squeeze was one reason the United Mine Workers recently agreed to a new three-year contract without a general strike against the members of the Bituminous Coal Operators Association. The economic reality facing the industry was sufficiently stark that the UMW settled without a strike for the first time in 18 years even though it got only a 10- to 14-percent wage increase. about one-fourth the increase in the last contract.

Anticipating a strike, most coal users in the United States and some abroad built large stockpiles that are now being worked off. Strike-hedge buying and a general increase in demand flowing from the strong U.S. economic expansion have combined to push production to new records this year, according to the National Coal Association.

There will be perhaps a 20-percent drop in output this quarter as those unnecessary inventories are re-duced, but production for the entire year is expected to reach 853 million short tons, a 9.2-percent increase from 1983. All of the increase will go either for U.S. consumption or inventories. U.S. exports are expected to remain at last year's level of 77 million short tons, the NCA said.

The production records were achieved with thousands of miners still unemployed and many of the small mines that were producing profitably for the spot market a few years ago still shut down.

A similar situation exists in Australia. Industry experts estimate that the nation currently could produce about 140 million metric tons annually but last year was able to sell only about 94 million. Miners are on layoff and industry profits are being hurt.

In Australia, however, it is domestic consumption that is very flat while exports have risen. During the fiscal year that ended last June, it exported 66.5 million metric tons, most of it metallurgical coal for coking and use by the steel industry. That was a 19percent increase over the previous year and an all-time

The price pressures in the industry are vividly illustrated by what has happened to prices for metallurgical coal (known as met coal) exported by the United States. In the first seven months of this year, met coal exports rose by more than 30 percent to a level of 34

erable downward pressure and profits are thin or non-existent.

average of \$52.55 a short ton.

Some of that increase in met-coal trade was offent. by a drop in that for steam coal. European imports of U.S. steam coal, for instance, were cut in half, com-

pared to the same period in 1983. Buyers such as the Japanese have been quick to take advantage of the industry's overcapacity. Industry sources say that Japanese negotiators have singled out one or another major U.S. producer and sought significant price concessions in return for promises to take a substantial and steady volume of coal. The concessions have been granted and orders to other American companies have dried up as their volume has been shifted to the larger producers with the lower prices.

The Japanese buyers have then used the lower U.S. export prices as a lever to get similar concessions from Australian producers, according to Anstralian sources. Australia supplies about half the Japanese market for met coal and the U.S. roughly one-quarter. A new concern has arisen in Australia that the U.S.

government may be trying to get the Japanese government to encourage more purchases of U.S. coal and thereby reduce the enormous bilateral trade imbalance between the two countries.

Meanwhile. American producers are concentrating on bolding down costs and improving profits. The companies resisted union demands for greater job security provisions in the new contract. At least one major company that was not fully a part of the BCOA, A.T. Massey Co. of Richmond, Virginia, has declined to accept the settlement's terms and has been struck by the union. But Massey has both union and nonunion mines, and with production cutbacks required anyway, the walkout by about 4,000 miners may not be burting the company that much, industry observers

Longer term, the outlook generally is for additional increases in steam coal production around the world

but little if any gain in met coal output. For environmental and other reasons, less and less coal is being used per ton of steel produced — and steel production itself is unlikely to be going up very much. On the other hand, most forecasters expect steam-coal use to rise at least in line with electricity generation is most countries, and faster than that in some, such as the United States, where coal's share as

a primary energy source is steadily rising.

From the industry's point of view, however, rising production alone probably will not mean high profits anytime soon. Overcapacity will be a problem for years to come, most industry analysts believe.

Demand for OPEC Oil Fails to Increase

(Continued From Page 9) Western world and a sharp increase of oil prices.

One explanation for this phe-

nomenon is the abundance of oil: Although demand estimation for 1984 indicates some increase in consumption by 1.4 million barrels a day to 1.5 million barrels a day. since last year demand has remained weak and oil production of non-OPEC countries has increased significantly. The North Sea pro-ducers increased their oil production this year by 300,000 barrels a day, and the Far East by 250,000 barrels a day. The Soviet Union increased its oil exports to member countries of the Organization for Economic Cooperation and Development to 1.7 million barrels a day in the second quarter. Malaysia, India and Egypt also increased production. Also, in the second quarter and the beginning of the third most OPEC countries produced above their quota levels at a time when they should have kept their output below the organization's overall ceiling of 17.5 million bar-

rels a day.

In July, OPEC output exceeded the organization's quota by at least million barrels a day, reaching about 18.5 million barrels a day, countries like Qatar and Saudi Ara-bia having overproduced. Qatar exceeded its quota of 300,000 barrels a day by some 200,000 barrels. Saudi Arabia lifted its production in July from 5 million barrels a day to some 6 million barrels a day, an oversupply that coincided with the conclusion of the Saudi barter deal under which the kingdom was pay-ing oil for the purchase of 10 Boeing 747 aircraft with Rolls-Royce engines. Despite the present reduction of OPEC's oil production, reported to be lower than the official overall ceiling at around 16.5 million barrels a day, the oversupply during the year by non-OPEC and OPEC producers, coupled with a still-weak economic recovery in the Western world, with the exception of the United States and Japan, has kept oil prices low. Another explanation for the weakness of the oil market is the continuing strength of the dollar. In Europe, in many cases - France and West Germany, for example -

the real cost for a barrel of oil increased and was reflected in the buyer's hesitation to lift oil and in the instability of stock movements that lead to the changing pattern of storage. Stockholders tend with the fluctuation of exchange rates to get rid of their stocks because of the ligh dollar. These difficulties, which have turned the oil market into a buyer's

market rather than a siller's, do not imply, however, that oil prices are heading for a collapse. On the contrary, oil prices seem to have entered into an era of stability because there is a definite common strong interest for OPEC and non-OPEC producers and consumers to prevent a collapse of the price of oil, which would be disastrous for the world economy. .

The London agreement of OPEC in March last year to reduce its when the oil embargo caused the prices and to implement the pro- West to panic. The U.S. deputy duction sharing policy its members assistant secretary of state for ener-have set for themselves proved that, when confronted by a real danger Energy Seminar last month: of collapsing oil prices - that is, a dramatic loss of revenue - OPEC member countries will, despite least another five and perhaps as deep political tension, manage to many as 10 years; it is even possible control the situation.

events that 10 years ago would have nor the international oil companies caused an economic crisis in the wants a collapse in prices. For consumers and the Western world a further decline of oil prices would mean that the highly indebted oil-exporting countries that pose spe-cial problems to the international financial system and to the prospects of a sustained world economic recovery would become a very serious source of risk for the world

financial system. According to the director general of Petroleos Mexicanos (Pemex). Mario Ramón Beteta, the external debt outstanding in 1984 of Algeria, Ecuador, Egypt, Indonesia, Malaysia, Mexico, Nigeria and Venezuela — OPEC and non-OPEC developing countries — is about \$250 billion. A sharp decrease of the price of oil, added a Pemex official, Mario Ramon Beteta, would have serious consequences on the external accounts of hese countries and would increase the likelihood of a series of defaults by sovereign borrowers. Also, a collapse of oil prices would threaten the serious implementation by consumer countries of their conservation and diversification effort.

In the short term and for the coming months until the beginning of 1985, OPEC countries can successfully defend the OPEC price if they manage to respect their offi-cial quotas, but if they overproduce as they did in the second quarter of 1984 it will be more difficult for them to prevent a further declining of prices. The temptation is great, however. OPEC's ontput is low to-day, its level of 16.5 million barrels a day reflects the weakness of demand for oil, and OPEC countries such as Nigeria or Iran that face huge economic problems are un-able to sell their oil. Nigeria never reached the quota of 1.3 million. berrels a day allotted to it by the OPEC conference last July, Iranian OPEC conference last July. Iranian oil exports dropped in August to 1.3 million barrels a day in June and July. Many other OPEC nations want to increase their production shares for more revenue. Iraq wants a higher quota. All these nations, including the United Arab Emirates and Kuwait, are waiting for an improvement in demand and would be tempted to overproduce if the danger of collapsing prices ware not too imminent.

The Saudi oil minister said in Angust that "with a certain degree of self-restraint on the part of OPEC and non-OPEC producers, we will definitely be able to support the present level of prices and avoid any unnecessary deterioration." It would not be an overoptimistic judgment to say that oil prices are coming to an era of stability, with all producers and industrialized na-tions realizing that it would be dangerous for the world economy to have a collapse in the prices of oil.

The time of sharp oil price increases is gone. The security of energy supplies to the West no longer has impact on oil prices it had in 1973, for industrialized countries are much better prepared to cope with such a problem than in 1973, There is no worry for a strong upward pressure on oil prices for at that in the interim we will see tem

porary price decreases. But it is gy which has characterized the ikely that by the 1990s we will be two years and which is a rest of faced with the need to expand oil conservation efforts, coupled with production and that real upward pressure on prices will return."

He also said: "IEA members hold available stocks equivalent to about 47 days of consumption, or 1.4 billion barrels. More than half of them are private. IEA members have been building stocks that are strategic, reserves that can be made in an emergency. The U.S. petro-leum reserve, which was insignificant in the 1970s, now holds more. than 430 million barrels of oil and is growing daily. We expect to reach our goal of 750 million bar-rels in 1990."

Reduced total demand for ener- stake.

banks do make energy loans, the watchwords are project finance, ex-portability, and risk sharing. To dilute risk further, some banks may look to private political risk insurance, export/investment risk insurance, offshore escrow accounts, and involvement by multilateral lending institutions, such as the

World Bank, as "honest brokers," Multinational energy companies. Despite the soft oil market, oil drilling continues. According to a study by the international accounting time Arthur Andersen, 300 yrivate oil companies spent an esti-mated \$89 billion in acquiring properties and oil exploration in 1980-82. The catch: 75 percent of the spending was in the United

States.
Ideas to encourage more Third World energy support have been none is yet close to fruition. One would set up a multilateral investment insurang program. This would reimbuse companies for an agreed perceylage of their expendi-tures if their exploration for hydrocarbons twied up only a dry bole. Another would set up an "energy. affiliate at the World Bank, which would provide equity capital for exploratory drilling in developing courties. Still another would expard the UN revolving fund for natural resources to include hydroarbon project financing.

Both businessmen and public officials agree that energy linance is not a one-way street. To benefit from it, developing countries will have to get their own houses in order, and, in particular, make themselves attractive to private investments. That means new guarantees to ensure the stability of contracts, more liberal policies on the repatriation of foreign investors' carnings, and, above all, tax policies that encourage, rather than penalize, energy-development.

GM Plants Struck To Be Sole Cloud for Subaru In Canada

U.S. Operations Are Threatened

Compiled by Our Staff From Dispatches TORONTO — About 36,000 members of the United Auto Workers struck at noon Wednes-day against General Motors of Canada Ltd. It was their first strike in 14 years.

The strike was expected to have an immediate impact on GM's op-erations in the United States, where many of the assembly plants de-pend on Canadian-made parts. The director of the UAW in Can-ada, Robert White, said there was no chance that a tentative agreement could be reached soon with Canada's largest automaker. "This is General Motors' strike." he said. "They are trying to fundamentally

change the bargaining process."

Mr. White said GM Canada caused the strike by pursuing an agreement similar to the pact worked out between the UAW and GM in the United States and ratified by 350,000 GM workers last

He said the company refused to admit that its labor and health-care costs were significantly lower in Canada. He also said GM Canada sought more concessions than in its 1982 agreement with the UAW, GM has said that its total package is worth \$12,000 per worker over three years, but Mr. White said most of those funds would be

diverted from benefits that the workers already receive. GM Canada's a chief negotiator, Rod Andrews, said the company had offered a package that exceed-ed \$10,000 for each worker over

Mr. Andrews said he expected the strike to immediately burt the parent company's operations in the United States. He said there would be layoffs and plant shutdowns within days. Separately Wednesday, the UAW's 158-member Ford council

approved the tentative contract reached with Ford Motor Co. and now will put it to a ratification vote by the union's 115,000 members at the No. 2 automaker. UAW leaders expect members to

pass the three-year pact handily, compared with the strident rankand-file opposition to the General Motors Corp. contract ratified Sunday. (UPI,AP)

Rowntree Targets North America

British Confectioner Sees Little Growth in Europe

New York Times Service

YORK, England — Rowntree Mackintosh PLC has torn down old warehouses here to build a new plant to make KitKat, the chocolate wafer bar that is its biggest seller.

But even while the new factory is going up, with the expectation of improving efficiency and increasing production in Britain, executives of this chocolate and sugar confectionery business are concentrating their hopes for growth on North

"It's such a huge market - strategically, that's why we like to be there," explained Kurt Has-linger, the company's deputy chairman, who over-sees Rowntree's operations in the United States and spends about 10 days a month there.

Rowntree's recently announced pretax profits indicate how much the company has come to rely on its North American holdings. For the first half of 1984, profits rose about 25 percent to the equivalent of \$28 million, with a stronger second half expected. Sales increased one-third to nearly \$600

And although speculation since January about a takeover bid has helped to maintain Rowntree's stock price at well over \$3.75, up from a low of \$2.70, much of the credit for the first half's success goes to last year's North American acquisitions: Tom's Foods, a fast-food business in the United States, and Laura Secord, a Canadian confectionery maker with its own retail outlets. These holdings accounted for 46 percent of the first half's

Nonetheless, North America represents essen-

Rowntree established a licensing agreement with Hershey Foods Corp. 15 years ago to market and make some of its products, including Rolo chocolate-covered toffce candies as well as KitKat. In spite of this, Rowntree has increasingly sought to acquire a U.S.company to make and distribute its own products there. That will be necessary, one analyst said, for Rowntree to compete nationally with such U.S. concerns as Mars and Hershey.
"Tom's provides a base for both geographical development and a pipeline for U.K. exports,"

Rowntree has operations throughout Europe, including France, West Germany, the Nether-lands, Italy and Belgium, It also owns businesses in Australia and South Africa. But its European operations, never very profitable, had losses equivalent to \$2 million in the first half of this year on revenues that exceeded \$114 million.

Kemp-Gee in London.

said Julian Lakin, food analyst with Scrimgeour

late, dividing up almost equally 80 percent of the market with Cadbury Schweppes and Mars. According to Rowntree's chairman, Kenneth

Dixon, the company's position is "well-established and highly mature." As one analyst put it: "Rown-

tree has plugged the various gaps in the product lines. There is little scope for growth in the U.K."

Rowntree is one Britain's three leaders in choco-

Dollar Sets High Against Pound,

Falls Elsewhere

climbed to a record Wednesday against the British pound, as traders reacted to the widening of the miners' conflict and the proposed cut in the price of British oil.

The pound was quoted at \$1.2008 in late trading in London, down from \$1.2045 Tuesday. It had briefly fallen to a record trading low of \$1.1905 Wednesday.

Traders feared that lower oil prices would damage Britain's economy because of the important revenue the country gets from its oil sales. The pound also suffered from fears that Britain's seven-month-old coal strike would spread and force the government to order cuts in electric-power usage by early next year.

The dollar fell, however, against other major currencies in hectic European trading Wednesday, as the Bundesbank intervened to protect the Deutsche mark.

Traders said the Bundesbank had sold about \$60 million in an effort to bolster the mark. As a result, the dollar fell as low as 3.0950 DM before ending at 3.115 DM in late trading. This compared with Tuesday's 3.137 DM.

In Paris, the dollar dropped to 9.52 francs at the closing fixing, from 9.6195 Tuesday.

week because of a decision by mine LONDON - The dollar supervisors to walk out. That would close down the few remaining coal mines being kept open by miners defying their union's sevenmonth strike. Although most European cur-

rency trading had ended before British National Oil Corp.'s confirmation of its \$1.35-s-barrel reduc-tion, the cut added to the downward pressure on worldwide oil prices that the Organization of Petroleum Exporting Countries is struggling to support.

The dollar began its trading day in Tokyo by rising to 250.35 yea. from 249.05 yen at Tuesday's close. It later was quoted in Europe at

Other dollar rates in European markets, compared with late Tuesday's trading were: 2.5335 Swiss francs, down from 2.5703; 3.50 Dutch guilders, down from 3.54, and 1.915.10 Italian lire, down from 1.933.80.

In bullion trading, gold edged up in London to \$340 an cunce, compared with from \$339.75 late Tues-

day.
But in Zurich, gold shipped to \$339.00 an ounce from \$340.50. Earlier in Hong Kong, gold fell \$1.39 to \$339.74 an ounce.

■ Continued Strength Seen The dollar should remain strong Analysts saw the coal strike as a in the near term because of a re-

Saudis Tighten Rules For Foreign Companies

Reuters foreign equity, effectively broaden-BAHRAIN — Saudi Arabia, its ing the definition to include all economy strained by falling oil rev- companies with minority foreign caues, is tightening rules on foreign shareholdings. companies operating in the king-dom, banking and legal sources here and in Saudi Arabia said

Wednesday.
They said the Ministry of Finance and National Economy has announced a tightening of a rule under which foreign companies tract at least 30 percent of the contract value to Sandi companies.

The ministry will delay contract payments to companies that do not comply with the regulation. Under the newly worded ruling, the ministry will define a foreign

company as a company with any

France Plans Surtax on Rich

PARIS - The French cabinet said Wednesday it plans a surtax in 1985 on the country's richest families to finance measures to fight poverty.

The surtax, which will boost

to 2 percent from 1.5 percent the controversial wealth tax on families with assets valueed at more than 20 million francs (\$2.1 million), is expected to bring in some 300 million

A government spokesman said after the weekly cabinet meeting that an immediate allo-cation of 200 million francs will be disbursed to assure housing and food to the poor.

Under the previous interpreta-tion, if Saudi interests held 51 percent of a company, it need not comply with the 30-percent rule.

The companies will also be required to procure all commercial, banking, insurance and transport services from Saudi businesses.

Banking sources said ministries have also been told to favor Saudi companies in awarding contracts, even if criteria used in the past would suggest use of a foreign con-tractor. Saudi companies now compete with foreign concerns in many

The so-called "30-percent rule," introduced in March 1983, was aimed at stimulating the Saudi

Banking sources said the tighten-ing of the regulation followed re-ports that Saudi Arabia's oil pro-duction had fallen to a 14-year low. Oil industry sources have estimated that September output averaged less than 4 million barrels a day, a level expected to continue this month. The country's output quota

ing, one lawyer in Saudi Arabia, who asked not to be named, said: "From all the indications we see, the Saudis are very serious about this rule. There are going to be a lot of tears flowing if you're a joint-

set by the Organization of Petroleum Exporting Countries is 5 mil-lion barrels a day. Commenting on the tighter rul-

venture company. Bankers said the new restriction worsens the already tough business environment for foreign companies operating in the Saudi Arabia.

NEW YORK — Prices were mixed at the close of the New York Stock Exchange Wednes-

429150

day in active trading.

The Dow Jones average of 30 industrials slipped 1.88 to 1,195.89.

slipped 1.88 to 1,195.89.

Advances slightly outnumbered declines on the New York Stock Exchange.

Big Board volume totaled 99.74 million shares, up from 82.93 million in the previous session.

After drifting most of the day on investor uncertainty about the economy and interest rates, the market staged a rally late Wednesday following news of Britain's decision to cut oil prices.

Energy stocks were battered by the cuts, which came a day after Norway lowered its North Sea prices, but the airlines and other issues began to pickup support.

Some investors, however, stayed on the side-lines to ponder the hundreds of corporate earn-ings reports that were being released. The mar-ket tends to drift during these periods.

Investors also were incertain about the course of the economy, which slowed down in the third quarter.

The Commerce Department reported bousing starts climbed 8.9 percent in September following a 12.3 percent decline in August. The increase, despite high mortgage rates, demonstrated the housing industry is far from collarse.

lapse.

Federal funds rates that banks charge one another for overnight loans traded at 10 5/16 percent. Traders were a bit disturbed Tuesday when they traded at 10½, up slightly from

12 Month High Low Stack Div. Yid. PE 1805 High Low Quot. Ch'pe

Monday's levels and the 9% percent level reached last week.

Investors are concerned the Treasury's huge \$42.3 billion borrowing program, delayed by congressional inaction on the debt ceiling, will push sbort-term rates up a bit. The Treasury sold \$5.5 billion worth of notes Tuesday.

Raiston-Purina was one of the most active NYSE-listed issues and sharply lower following a block of 3,487,900 shares at 33½. Raiston said it repurchased 3.5 million of its own shares.

Gould Inc., which reported third-quarter earnings from continuing operations of 50 cents a share vs. 42 cents a year ago, was lower in active trading.

Swedish Match Profit Jumped

International Herold Tribune
STOCKHOLM — Swedish had risen 16 percent, to \$249 mil-Match, the diversified industrilion compared with \$215 million a al group, making floor cover-ings, kitchen furnishings, pack-aging and matches and lighters, In the third quarter, the company said, net income rose to \$91 reported Wednesday that its million, compared with \$76 million pre-tax earnings more than tripled to 689 million kronor (\$78.4 million) in the first eight BankAmerica said those results months of 1984.

The sharp rise was mostly due to extraordinary income of 450 million kronor from sales of real estate holdings and other assets, the company said in an interim report. Exclusive of extraordinary items, Swedish Match said its pre-tax profits were up 18 percent to 239 miltion kronor from 202 million

kronor a year ago. Operating earnings, excluding financial items, were up 25 percent to 393 million kronor from 314 million kronor in the first eight months of 1983.

Sales of Swedish Match rose 14 percent to 6.103 billion kronor from 5.367 billion kronor. Swedish Match forecast that earnings for all 1984 would rise 15 percent to around 480 million kronor from 417 million kroner in 1983.

Long-Term Indicators MCI also plans to expand its mail service worldwide. The com-pany said that after tests next Rise 2.2% in Britain

Subaru Faces

U.S. Curbs (Continued from Page 13) June by Russell C. Mosteller Jr. recommended Subaru then and is

still recommending it. "For the long-term outlook," Mr. Mosteller said, "we project a 20-perceot compound annual growth rate in earnings per share, as we expect that Japanese auto import restrictions will gradually ease and strong pent-up consumer demand for Subaru's front-wheeldrive and four-wheel-drive vehicles will stimulate retail sales."

Subaru itself seems extremely bullish, despite increasing import competition from Ford, which plans to build cars in Mexico for sale in the United States, and General Motors, which is importing cars built by Suzuki and Isuzu in Japan to be sold by Chevrolet. "We have our niche in the mar-

they have theirs." Moreover, he said, in a "customer-satisfaction" study conducted by J.D. Power & Associates, the anto-marketing information com-pany, of Westlake Village, ocar Los Angeles, Subara ranked in second place, just behind Mercedes. A year ago Subaru stood in third place behind Mercedes and Toyota, but this year Toyota fell to fifth place,

ket," said Subaru's Mr. Reich, "and

As for the possibility that import restraints might be lifted in the future, he maintained that even so "the Japanese don't want to exacerbate the situation back to 1981, when limitations were imposed because of weak U.S. sales, and would "not come full blast into the United States,"

with Honds and Lincoln ranked

third and fourth.

Meanwhile, what about Subaru's cash hoard? The company already owns five distributors, while 10 others are independent. Several of these, Mr. Reich said, will become available over the next few years,

espite pessimism often expressed in world's largest trading coun-West Germany, their economy appears to be well on the road to recovery. The strong U.S. dollar, which has been the center of

attraction for some time now, has tended to overshadow the surprisingly strong performance of the D-mark over the same period. Although it has declined in value substantially against the U.S. dollar since the end of 1982, compared with a basket of other major currencies it has held its own quite well.

West Germany is clearly an economic giant with a high per capita income, ranking first among the

tries. Taking this into consideration, it is advisable for a well balanced international portfolio to include an appropriate share of D-mark investments.

THE GERMAN ECONOMY

The key questions, of course, are: What proportions, and timing?

G.T.E. INTERNATIONAL INC By Manufacturers Hanover Trust Company. Paying Agents, New York.

More circulation in more major cities in more major countries. That's what it takes to be the leading

U.S. husiness publication in Europe and Asia. And we accomplished it in such a short time.

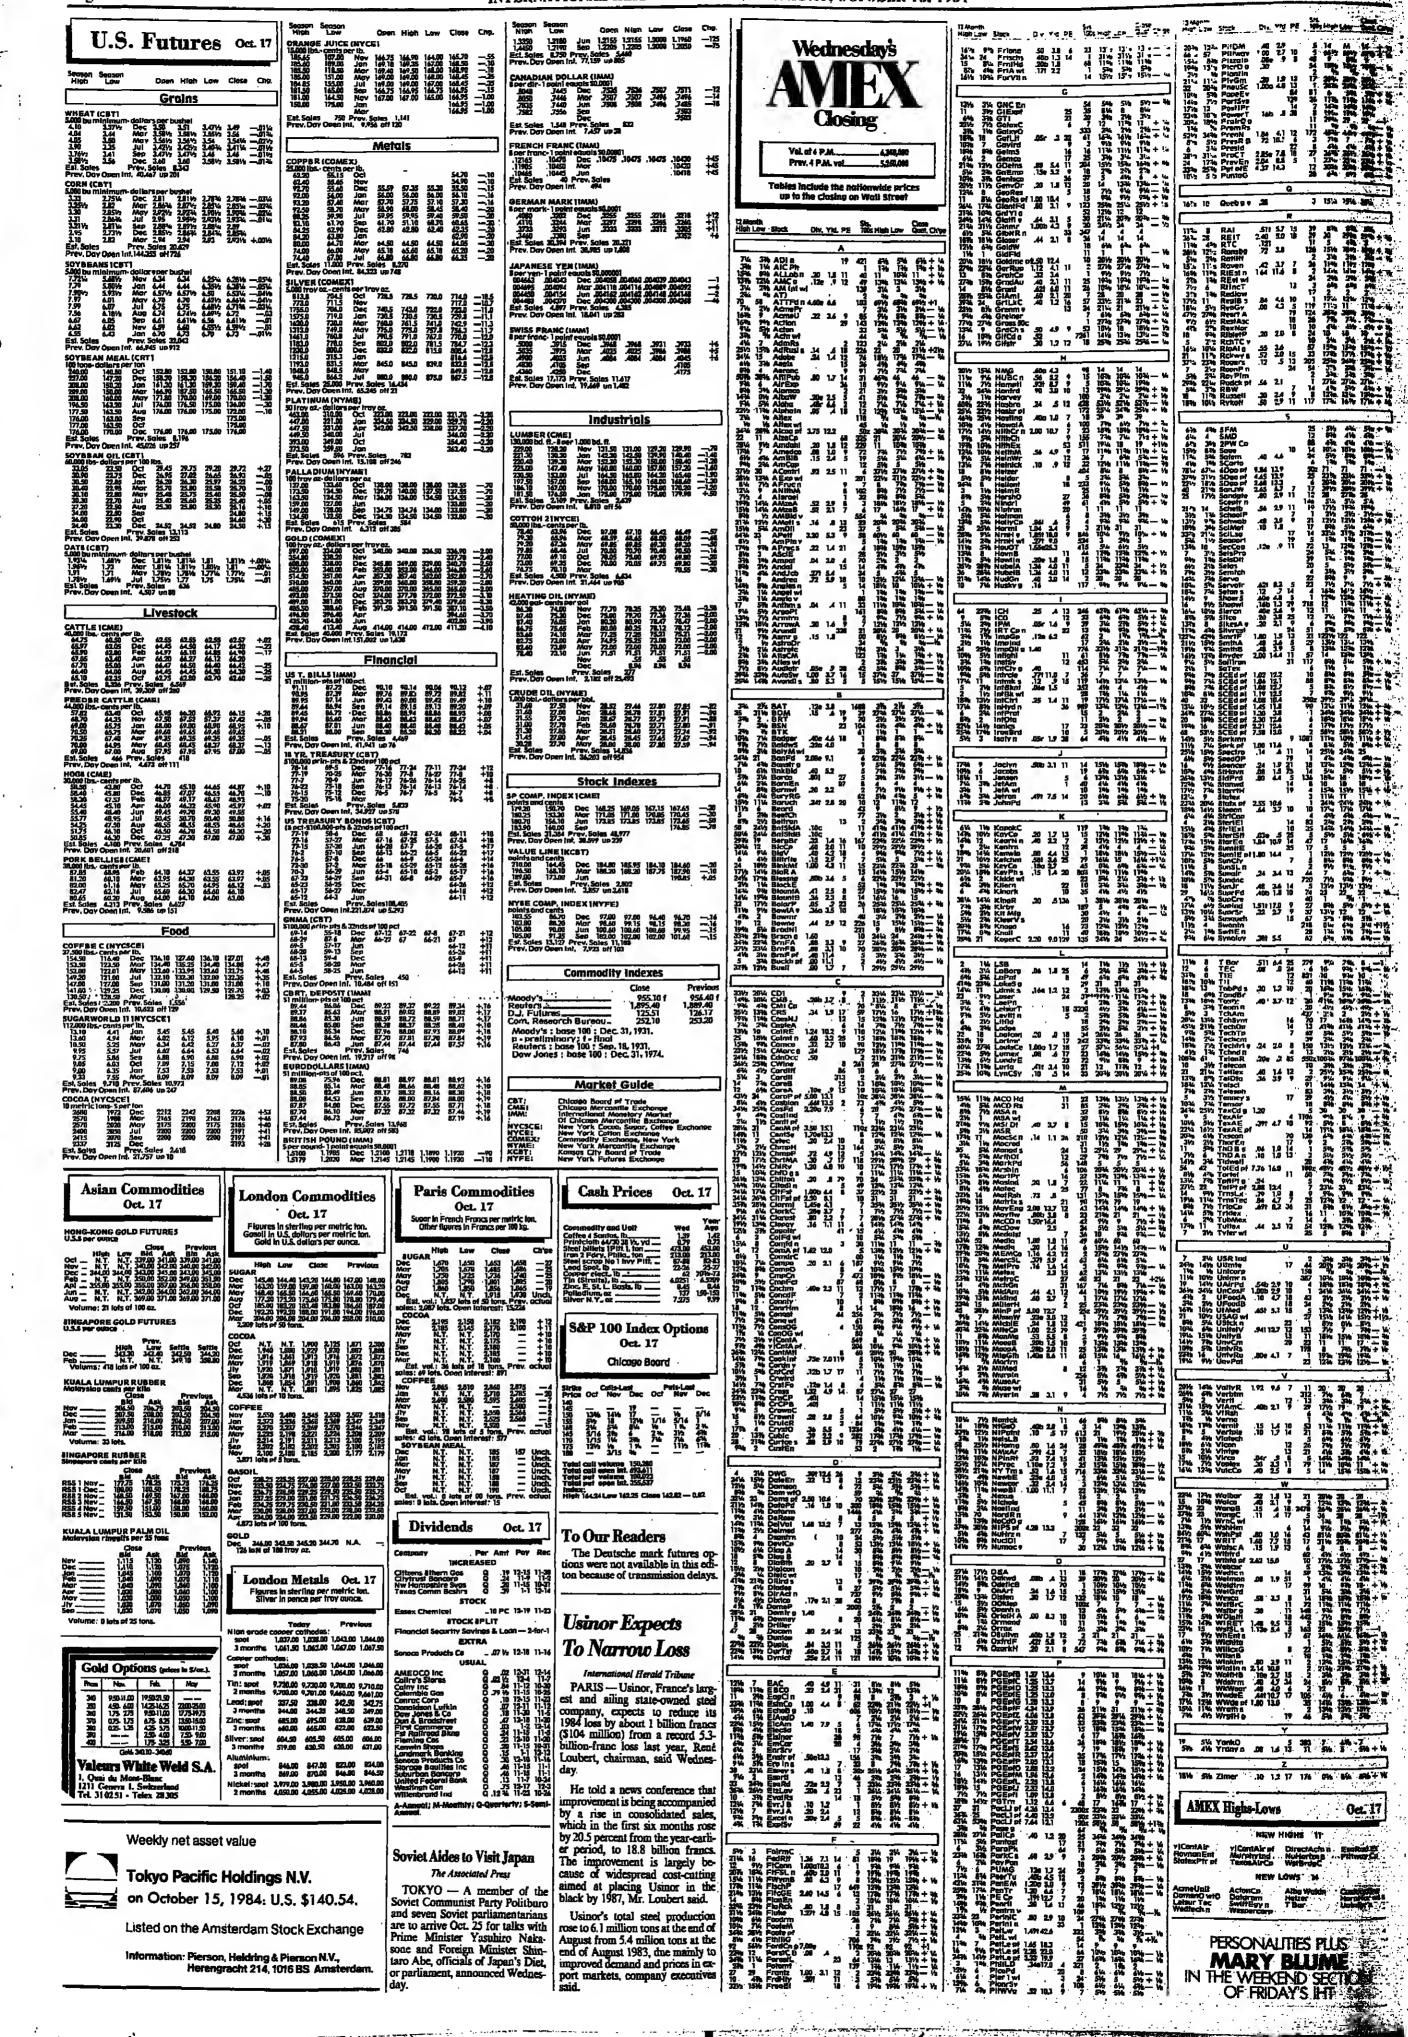

Outside our North American home, FORTUNE International's circulation is larger than that of *The* Wall Street Journal and Business Week. We also lead in sales outside the U.S. and home country, with more circulation than Germany's Capital, France's Nouvel Economiste, the United Kingdom's Financial Times. and Hong Kong's Far Eastern Economic Review.

Our prestigious, influential subscribers are your prime prospects for business advertising and consumer products and services. Fifty-three percent are at top-level management positions; 79% have international husiness dealings.

Do business with FORTUNE and you will have

something to celebrate, too. In Europe, contact Charles E. Florman, European Director, at 499–4080 in London, Telex: 22557.

Reserve Board said factories, mines units, off 3.7 percent from the Auand utilities operated at 81.9 percent of capacity last month, a sharp drop from the 82.6-percent rate in

The factory-use figures were in tine with the industrial production indicator reported Tuesday which turned down in September for the first time in nearly two years. But most economists said that slide was only a temporary setback for the economy and not a signal of a full-

Air Canada Head Pushes Line's Privatization

MONTREAL - Privatization of government-owned Air Canada would be a logical move, the air-line's president, Pierre Jeanniot, said in a speech to the Montreal Chamber of Commerce. He said he hoped such a move would start with employee participation.

Mr. Jeannion said Tuesday he believed that Canada's moves to deregulate air transport have been prudent. He said Air Canada is esponding with a stringent costcutting program and expansion into new markets, citing the air-line's recently announced plans to begin service to India and Singa-

WASHINGTON - U.S. new- ing report that construction was

But an indicator of future building plans slipped. Commerce said construction permits were taken out at an annual rate of 1.4 million

lo the factory-use report, a previous report that August operating rates were unchanged was revised

"A one-month decline in this index does not signal a recession," said Robert Ortner, chief economist for the Commerce Department. "This economy does not resemble anything like a business-cycle peak. It resembles

There are beginning to be the first signs of a growth recession."

Mr. Martin said.

PARIS - France's adjusted trade surplus narrowed to 477 miltion francs (\$49.7 million) in Sep-tember, from 3.5 billion francs in August and 323 million francs in the year-earlier period, the finance minister, Pierre Bérégovoy, said

BOOKS

HOME BEFORE DARK

By Susan Cheever. 243 pp. 515.95. Houghton Mifflin, 1 Beacon Street, Boston, Mass. 02108

Reviewed by Brigitte Weeks

Company of the farmer of the farmer of father; it is a portrait of the artist as a young man, a middle-aged man, an old man. a siek man. It is, in fact, one of the most moving and intimate books I have read in years.

John Cheever, who died in June 1982, was a creature of his own imagination, his only daughter tells us. The gifts that made him a brilliant short story writer and novelist also created a man who evidently had a loose and ever-changing relationship to reality. "I write to make sense of my life," John Cheever used to say. He advised his daughter to do the same. She has done so as the author of three novels and although she "never intended to become his biographer," she here undertakes to make sense of his life for the rest of us.

Her exercise in family archaeology inevitably unearths pain, beginning with the disintegration of John Cheever's childhood: his father's husiness failure, his mother's efforts to support the family with a gift shop, the drink-ing, the divorce, the sale of the family home, above all the lack of affection for an unwanted last child. Psychiatrists were energetic in their efforts to persuade an older, troubled John Cheever, that all his problems stemmed from his relationship with his parents, but Susan, with a perspicacity out shared by the professionals, points out: "He had spent his life escaping the past; he wasn't about to return to it voluntarily." Cheever made his way from Wollaston, Massachusetts, to New York City, aged 18, to be a writer of fiction. He stuck to that uncompromising plan for the rest of his life, through first critical success, critical doldrums and, finally, tremendous critical ac-

His daughter brings alive the years before her arrival as skillfully as she does the period of her own growing up. Her narrative, however, is not strictly chronological but laced with in-sights from later years or flashbacks to earlier times, a method held together by a sense of peace and the knowledge that all struggles are concluded. She retells both the legends and the reality and it is hard to care which is which. In the early days of their marriage John and Mary Cheever and their young daughter lived in an apartment on East 59th Street. "In the morning when I went to school, my father would put on his one good suit and his gray felt hat and ride down in the elevator with the other men on their way to the office. From the lohby he would walk down to the basement, to the windowless storage room that came with our apartment. That was where he worked. There, he hung up the suit and hat and wrote all morning in his boxer shorts, typing away on his portable Underwood set up on a folding ta-ble." The appearance of a regular, respectable life mattered even then.

An odd family these Cheevers. Not wholly likeable or admirable. The parents' marriage was an on-again, off-again affair, either in the emotional tropics or the Arctic. There was so

much backbiting and arguing around the fam ily dining table that some guests couldn't stand it. But clearly John Cheever cared deeply about his family — wife Mary, sons Federace and Benjamin, and Susan: My father level his children. The three of us were, as he said, the roof and settle of his existence." He liked to see his family gathered together in the his house in Ossining. New York, with its rolling lawns and barking dogs, in appearance is perfect upper-middle-class family. But, looking back, it seems to Susan that in Cheever life, is: in his writing, appearances were what really-counted. "We were all told that appearances, were not important, but no one believed if for a minute. My father described everything in terms of appearances . . .

But "Home Before Dark" is no "Deddy Dearest," a child's settling of scores. The wooder of this book is the astonishing combination of dispassion and compassion with which Stsan Cheever portrays her father. Assemble her portrait, Susan uncovers the personality of her father layer hy layer - although her mother remains a somewhat shadowy figure. Flaving written this book in part to assuage the pain of John Cheever's death, she realizes. "I know my father better than I ever did while he was

The clouds began to gather in the 1960s, just as John Cheever became firmly established as a master of the short story and a successful. novelist. But appearances no longer matched reality. They masked a middle-aged man losing himself and his talents to alcohol. "Drink was: his crucible, his personal bell," and "by the first years of the 1970s, the inevitable first drink of day came sooner and sooner. Eventually it blended with the last drink of the evening." His marriage, always in peril, seemed to be disintegrating. The children were caught in the cross-fire. They both confided at length and in explicit detail to me. Susan grimly remem-bers, "or anyone else who would sit still longenough to listen. Not only did I wish they wouldn't. I began to wish they would get

Writing about one's own father fighting it coholism, regaining fame, becoming "his own number one groupie" and finding young lovers of both sexes is an almost impossible task, but Susan Cheever does it — with restraint and understanding: "I think it was partly his fear of his own desires that kept my father drinkings and I think his anview over his sexual ambiguity." and I think his anxiety over his sexual ambivestlence also kept him married." She keeps besself in the background most of the time so that when she is on stage the reader has no feeling. of exploitation or voyeurism.

Strangely, it doesn't really matter that the subject of this book is one of the great literary, names of our times. He could be a politicing of a painter or a financier. There will be other. books about John Cheever - doctoral theses hterary biographies, lovers' recollections but there will never be another book about John Cheever like this one. No one will love him quite as Susan Cheever does. No one will 1 fear him and fight with him as his daughter has. "How could I love him?" she asks as he lay dying. With this book John Cheever's daughter. answers her own question. For better, for-worse, she loved him.

dation or veyeurism.

with the last drink of the evening."

reflects so well on his father be-cause Seattle Siew has beyond any ng about one's own father fighting at doubt proved himself the most important new sire of the last genera-

one-forneth shares in his breeding rights were sold for \$2.9 million and \$3 million earlier this year, making him worth a theoretical \$146 million to \$120 million, lodividual breeding seasons have been bartered for as much as \$800,000,

That is, of course, a huge return on a horse who was sold for \$17,500 as a yearling. More surprisingly, it is an unusual and unpreceted success for a winner of the U.S. Triple Crown.

The last five horses who won the Kentucky Derby, Preakness Stakes and Belmont Stakes all went to stud amid high hopes, but all except for Scattle Siew are regarded as major disappointments.

Assault, who won the Triple Crown in 1946, was found to be sterile. Citation (1948) wasn't much better; his failure to sire anything aiscent of himself in part led to the long decline of Calumet Farm. Secretariat (1973) was bred to the best mares in the world and was looked to as the successor to Bold Ruler as the world's most influential sire. While he ranks among the

top 5 percent of U.S. stallions, be has not produced a U.S. champion or a horse with any of his brilliance. Affirmed (1978), who stands o few stalls down from Seattle Slew at Kentucky's Spendthrift Farm, has become the disappointment of the breeding world. He has yet to sire a U.S. stakes horse, while Alydar, whom he beat in all three Triple Crown races, bas turoed out one stakes-winner after another. Seattle Slew entered stud amid

mixed expectations and musual ion and figures to influence the circumstances. Jim and Sally Hill breed for generations to come. Two and Mickey and Karen Taylor,

ries, Devil's Bag was retired with an injured knee, and Swale went oo to win the Derby and the Belmont. Eight days later, be died suddenly from what has only tentatively been diagnosed as heart failure.

(UPI, AP) on 3-year-old.

about Seattle Slew's breeding start is the versatility suggested by his three best offspriog. Landaluce was precocious and

crops, but even more impressive

brilliant, abowing blazing speed as a 2-year-old. Swale was professional rather than fast at 2 and then matured into a top 3-year-old, winning at the classic mile-and-a-half Belmont distance. Slew o' Gold, immature at 2 and still finding himself through most of his 3-year-old seasoo, blossomed last fall and has returned even stronger at 4. Given his continuing improvement, it is tantalizing to think how Landaluce and Swale might have developed had they lived longer.

The inevitable question is whether the father or son is the better raceborse. "Up to a mile and a quarter, I have to say Seattle Slew might have been a little better," says Mickey Taylor. "But at a mile

Angel Cordero Jr., who rode both through their fall zeries, thinks they are "oot too far opart. They're so much alike, all that strength and macho. Seattle Slew was fiercer, faster, but this other horse is smoother, more like a pro."

It is unfair to contrast the two on the basis of their 3-year-old sea-sons, for Slew o' Gold had not approached his full ability during the Triple Crown. Their 4-year-old seasons are far closer.

Seattle Slew lost his bid for a weep of the fall series in the 1978 Gold Cup, a race he lost by a cose but in which he may have won more admiration than ever in his career. After dueling with and dis-posing of the Triple Crown winner, the New York-bred horse of the Affirmed, through six furlongs in a plazing 1:09, he was caught in midstretch by the fast-closing Exceller but theo, almost nobelievably, came back and was regaining the lead when the finish line came up.

Last year as a 3-year-old, Slew o' Gold was deprived of a sweep by an only slightly larger margin. He won the Woodward and the Gold Cup, but in between those triumphs came defeat in the Mariboro by a oeck (be lost more ground than that under Cordero's daring but questionable ride). This year, Slew o' Gold overcame a slow pace and a muddy track to beat the reformed claimer Shifty Sheik in the Woodward, and then ran better in the Marlboro to beat the outstanding 3-year-old Carr de Naskra in the Marlboro, He ran both those races wearing bar shoes in protect a

tender foot injury.
On Saturday, the shoes are likely to still be there, but only because be is accustomed to them now. His win him the title of 1984's champi- trainer, John Hertler, expects him to run his strongest race of the year.

The Associated Press

ANAHEIM, California - Gene Mauch, who resigned as manager of the California Angels two years ago, will return to that position in 1985, the American League team announced late Tuesday.

Mauch quit shortly after the Angels lost the 1982 American League playoff to the Milwaukee Brewers. California won the first two games: of that series but dropped the next

John McNamara, hired to replace Mauch, announced last week that he would not return as manager; McNamara is considered the top candidate for the Boston Red-Sox managerial post, vacant since Ralph Houk retired. Mauch, who will turn 59 next-

'Little Drummer Girl' Explores Mideast Causes

By Nina Darnton New York Times Service

EW YORK - When the di-Nector George Roy Hill and the scriptwriter Loring Mandel first met with the British novelist John Le Carre to discuss the filming of his best-selling spy novel, "The Little Drummer Girl," they holed up together for three days in the novelist's chalet in Switzerland. When they finally emerged Hill said, in mock despair, "Great. Now we've got an eighthour film."

Le Carré then took them to Beirut to visit Palestinian refugee camps so they could get "the buzz" of the Middle East. They returned to the United States with a script still two times too long and with, as Le Carré put it, an increased sense of "a solemn obli-

gation to the material." Beirut is only one of the locations in the novel, which moves around the globe in dizzying twists of international events and intrigue. But the multiple nationalities, the complexities of the plot, the large cast of characters and the wide range of locales in this weighty and controversial novel were only the beginning of the filmmakers' difficulties.

The main problem in attempting to remain faithful to the book was dealing with what the film-makers saw as its political balance. They strove to be evenhanded in portraying Israelis and Palestinians engaged in a violent struggle for their causes and their survival in the supercharged, highly sensitive arena of the Mid-

"We weren't making a political film," Hill said. "We have no po-litical ax to grind. We were making a suspense story that happened to have a political background. But we wanted to be true to the book, which we believe to be evenhanded. The book shows the Palestinians for the first time in a human light, Up until then, they were seen as

bloodthirsty monsters."
The film, which opens Friday in New York, stars Diane Keaton as Charlie, the innocent actress, initially pro-Palestinian, who is recruited by the Israelis to work as a double agent to ensuare Khalil, a Palestinian terrorist. Under the direction of Israeli agents, she joins in a "theater of the real,"

Yorgo Voyazgis and Diane Keaton in film version of "The Little Drummer Girl."

manufacturing a false love affair with Khalil's younger brother, which will lead her inexorably to Khalii.

As programmed, she falls in tove with Joseph, the Israeli operative who trains her. But although the surface themes are love, intrigue and identity, they are played out in the cauldron of Middle East politics and the questions of Israel's right to exist, of the Palestinians' right to a bomeland and the moral limits, if any, on nationalistic struggle.

Like the book, the film does humanize the Palestinians, and it seems likely that it will engender even more controversy than did

The novelist has continued to arouse passions by publishing some articles sympathetic to the Palestinians after the Chatila massacre in 1982. Nevertheless. be denies that this makes him anti-Israeli.

"It's almost a vulgarity to confuse a balance of compassion with a want of sympathy for Israel," he said. "If I had written the book later, after the full extent of the Israeli operation was known, I would have made it angrier. But 1 begin and I end, believe it or not, as a tremendous supporter of a concept of Israel."

The movie does not proclaim

itself explicitly on one side or the other. A catalog of the ills suf-fered by each side would probably add up to a fairly even score. Palestinian terrorists bomb an Israeli family. They beat up and murder Dimitri, an Israeli spy caught in the Palestinian train camp. The Israelis capture, tor-ment and kill Khalil's brother, Michel, among others.

But still, making the movie called for tremendous amounts of surgery and, in some cases, ampu-

"We had to make a selection," Mandel said. "We tried to isolate those things from the book that told the story in an efficient way and make it come within the

range of a two-hour film." Two of the principal characters underwent major personality changes — Keaton's Charlie and Kurtz, the chief of Israeli counterintelligence, played by the Ger-man actor Klaus Kinski.

In the book, Charlie is a young English actress in her 20s struggling to get started with her career. She is fuzzily leftist, scattered, without direction, a kind of lost innocent with good intentions and some pretensions. In the film, she is an American from the Middle West, on the brink of middle age, and unsuccessful in her career. Her politics remain the

same, but she has more of the selfconfidence of a mature woman. "It is true," Le Carré said, "that if one was fond of Charlie in the of how a change made for dra-book one would have to start matic impact can sultly change again with Diane. But we had to the film's psychological effect. have an actress with tremendous range and great authority. She carries practically every scene. We now have a character who still

estinians even if in the process he has to act against his own conscience, Joseph, who had resigned from the secret service and was brought back for this mission, ftnally withdraws from the conflict altogether, saying that he no longer knows what is right from what is wrong.

Le Carre originally objected to the casting of Kinski because "I thought he carried too much bag-Israeli" and not so harsh.

Another is the scene in which Charlie is recruited by the Israelis. Called the "brainwashing" scene by Hill and Mandel, it runs close to 100 pages in the book. The film Charlie's moment of decision.

PEOPLE

Chinese Honor O'Neill With Version of 'An Di'

After the successful opening of Eugene O'Neill's "Anna Christie" in a new Chinese adaptation in Beijing, the American director and playwright Tuesday on the 96th an-niversary of his birth. The scene Chinese cast raised a toast to the was set in 1930s Shanghai, not the United States, the heroine was renamed "An Di" and kisses were replaced by hugs to conform to traditions of public restraint in China. But the story of a prostatute's reconciliation with her father and boyfriend was otherwise faithfully recreated by director George White of the Eugene O'Neill The ater Center in Waterford, Connecticut. "By God they did it. They didn't miss a note," said White, the second American invited to direct a play in communist China. Arthur-Miller directed his "Death of a Salesman" in China last year.

Police discovered 15 milligrams of cocaine on a \$20 bill in the hotel room in West Palm Beach, Florida where David Kennedy's body was found, according to newly released dneuments. Investigators also found traces of cocaine and the painkiller Demerol in the toder. Kennedy, 28, the son of the late Senator Robert F. Kennedy, was found dead the morning of April 25 in his \$250-a-day suite. An autopsy revealed that he had died of a mixture of cocaine and twn prescription drugs - Demerol and the tranquilizer Mellaril. The documents also revealed that Douglas Moschiano, an employe at the hotel, had told investigators that Caroline Kennedy and another woman \; visited the hotel about 90 minutes before Kennedy's body was discovered. He said that the two women had walked through the hotel courtyard toward Kennedy's room but that he did not know whether they had entered the room. In a statement through Edward M. Kennety's Senate office, Caroline Kennedy denied that she had been in the room.

Bob Hope has rediscovered his Welsh roots - odd for someone born in Eltham, England, and now as American as the usual pie But after visiting the house in Barry, South Wales, where his parents lived in 1890, Hope, 81, said: "Now I can say I'm half Weish and half English."
